French Club

Celebrate French language and culture

Our goal with this club is to make friendship bracelets and distribute these to sick kids in various hospitals around the twin cities. We will attach a note with the friendship bracelets saying: who made them, their grade, and one or two activities they enjoy doing. From this it will give the sick child receiving the bracelet an idea of who actually made the bracelet for them, and this will make it much more meaningful. In a way this creates a similar system as the "pen-pal". We hope these friendship bracelets give the children a sense of connection and just simply make their days better and put a smile on their faces.
