School Improvement Plan – Coleen Smith

Goals were to improve BOY-MOY by 10%. Suggestion was made to change this to 2% or 3% for the next year. Also discussing possibly changing from percentage to moving bubble students. Also discussed having a behavior-type goal, tracking attendance trend in families and reduce percentage of referrals to the office. In families with excessive absences, discussed sending someone to their homes to see how attendance/tardies can be improved. For a math goal, discussed possible change from percentage to moving bubble students. For our technology-type goal, discussed the New Refresh plan
