# **Troy School District Media Center Furniture Bid # 9342**

The Troy School District is seeking bids for the purchase and installation of media center furniture for twelve (12) elementary schools and one (1) middle school. The accompanying bid specifications pertain to each individual building.

The District specifically reserves the right to award this bid either in total or to split the award by individual building. Potential vendors are encouraged to submit a complete bid package; however, no requirement is imposed upon bidders to submit pricing for every project.

By submitting a bid herewith, bidders acknowledge that they have read the complete requirements, verified measurements (where applicable), and agree to all terms and conditions of this bid package.

**SPECIAL NOTE: Because all of the items requested and the anticipated delivery dates are subject to construction scheduling, bidders must take complete responsibility for timely delivery to each location. When necessary due to construction completion, bidders awarded under this bid agree to properly store and secure furniture items until such time as the respective facility is available for safe and secure delivery and installation of said furniture items. No additional cost for storage shall be incurred by the District.**

**Bid Bond:** Each bid must be accompanied by a cashier's check, certified check, money order or bid bond payable to the Troy School District in an amount not less than five percent (5%) of the base bid. This shall serve as a bid guarantee. Bid Bond shall be provided by a company licensed to do business in the State of Michigan.

The successful bidder shall provide a performance bond and a labor and Material Payment Bond, covering the faithful performance of the Contract and payment of all obligations arising there under, each in the amount of one hundred percent (100%) of the contract amount. Bonds shall be provided by a company licensed to do business in the State of Michigan. The cost of such bonds shall be included in the Bid.

Should the Bidder refuse to enter into a Contract or fail to furnish such bonds, the amount of the bid security shall be forfeited to the District as liquidated damages, not as a penalty.

Awarded bidders also agree to provide proof of liability insurance (\$1,000,000 minimum) and worker's compensation insurance to the District. The Troy School District must be fully indemnified against any potential claim resulting from the performance and completion of this project.

**AFFIDAVIT OF BIDDER**

The undersigned, the owner or authorized officer of \_\_\_\_\_ (the "Bidder), pursuant to the familial disclosure requirement provided in the \_\_\_\_\_ (the "School District") advertisement for construction bids, hereby represent and warrant except as provided below, that no familial relationships exist between the over(s) or any employee of \_\_\_\_\_ and any member of the Board of Education of the School District or the Superintendent of the School District.

SECTION 12315  
LIBRARY FURNISHINGS

PART 1 - GENERAL

1.01 SUMMARY

A. Section Includes:

1. Furnishings and installation of casework, furnishings and equipment.

1.02 SUBMITTALS

- A. Product Data: Submit manufacturer's specifications, installation instructions and general recommendations for each major product required. Include data substantiating that products to be furnished comply with requirements of the contract documents.
- B. Subcontractors: The successful bidder will be required to submit a list of all subcontractors and trade names and model of equipment on which his proposal is based. This list shall be subject to the approval of the Owner. After such approval is given, no changes shall be made without consent from the Owner.
- C. Shop Drawings: Submit complete shop drawings for unit placement and installation, including plans, elevations, and large scale details of typical sections and connections.
1. Provide layout, dimensions, and identification of each unit corresponding to sequence of installation and erection procedure.
  2. Provide location and details of anchorage devices to be embedded in or fastened to other construction. Furnish templates if required for accurate placement.
- D. Before an award is made, the Owner reserves the right to require submission of full size samples of stock items and layout drawings of fabricated items for approval or rejection.

1.03 QUALITY ASSURANCE

- A. Reference in the specifications and quotation forms to any article, product, material, fixture, form or type of construction, etc., by proprietary name, manufacturer, make or catalog number shall be interpreted as establishing a standard quality of design and shall not be construed as limiting competition.
1. Accessories: Provide accessory items only as produced or recommended by manufacturer of primary products.

2. Manufacturers requesting approval shall submit evidence of at least ten (10) years experience and installations for similar type and size of project. Manufacturers shall also show evidence of production capacity, financial stability, plant facilities, catalogue and specifications. Full-sized samples, catalogue and specifications, shall be submitted with written request along with detailed list of deviations from these documents for approval.

#### 1.04 SUBSTITUTIONS

- A. All items of furniture and equipment must conform to the specifications but substitutions of equal quality will also be considered. Basic design and arrangement of this equipment as to doors, drawers, shelves and interior arrangement has been determined by specific requirements, and bidders shall make no exceptions. All bidders are required to furnish all equipment called for on the drawings, and in these specifications, from one manufacturer, to maintain the same high quality material, workmanship, and have strict uniform color match of finish and hardware. The Owner, from a full range of finishes, shall select colors and plastic laminates including solid color laminate tops. The design, finish, and choice of colors of items shall be considered as characteristics in determination of equality of substitutions.
- B. Each quotation shall contain a list of the manufacturer's name, item number and full description of the stock items that it has proposed to furnish as equal to the scheduled items, along with catalogs showing full specifications of each item. Failure to comply with this requirement shall be cause for rejection of contractor's bid.

#### 1.05 DELIVERY, STORAGE, AND HANDLING

- A. All items of furniture and equipment shall be delivered to the building, unloaded, assembled and set in place. Vendor shall carefully clean, touch up or otherwise make ready for use all items in this contract. The vendor shall be responsible for complete installation in every respect.
- B. Delivery and Storage: Keep materials dry at all times. Protect materials from excessive moisture in shipment, storage, and handling. Deliver materials in manufacturer's unopened packages, and store in dry place with adequate air circulation.

#### 1.06 WARRANTY

- A. Special Project Warranty: Submit a written warranty signed by the manufacturer, the contractor, and the installer, guaranteeing to correct failures in materials and workmanship which occur within the warranty period, including those attributable to abnormal aging, without reducing or otherwise limiting any other rights to correction which the owner may have under the contract documents.
  1. The warranty shall include responsibility for removing and replacing other work as necessary to accomplish repairs or replacement of materials covered by the warranty.
  2. Warranty period:
    - a. 2 years after date of substantial completion for seating, except upholstery material.
    - b. 5 years after date of substantial completion for wood cabinetry or shelving items.

## PART 2 - PRODUCTS

### 2.01 MATERIALS

- A. Wood: All hardwood is northern grown and free of imperfections. After slow air seasoning, it is carefully kiln-dried to a moisture content of 5% - 7%. Glued-up panels will have two surfaces faced and will be uniform in color, using random widths not less than 1" or more than 4".
- B. Wood species: All exposed wood is northern grown grade "A" maple and/or oak selected for uniformity of grain and color.
- C. Plywood: Plywood will be constructed with an odd number of plies to resist warpage. All inner plies will be sound and cross-banded. Face veneer will be selected for uniformity of grain and color on one to both sides, as design of each item requires.
- D. Lumber Core: Lumber core shall be 5-ply of the best grade with tight glue joints and controlled strip width to minimize warpage. Lumber core table and carrel tops shall be 1-3/16" thick, 5-ply construction meeting American National Standards Institute, Inc. standards for AClear Grade≡.
- E. Center Core of Lumber Core Panel: Will be constructed of wood strips 1" thick and not less than 2" nor more than 4" wide. Wood strips will be Afull length≡ of the panel, with no butt end joints, and will run the longest dimension of the panel. The wood strips will be free of knots or other defects. All wood strips shall be glued together on all edges to form Atight joint≡ construction, creating a Asolid core≡ panel. Panels will be made of solid poplar hardwood.
- F. Cross Bands of Lumber Core Panel: Shall be of minimum 1/10" thick poplar, applied to the top and bottom of the center core, with grain direction at 90 degree angle to the grain of the center core.
- G. Plastic Laminate: Plastic laminate for work surfaces will be .050" thick balanced by a backing sheet not less than .020" on the reverse side to prevent warpage. Only low glare finish will be used to provide low reflection surface with a gloss meter reading of 4-10 machine direction. All laminate will be bonded to core with hybond #80 contact cement under high-pressure. Laminate used meets or exceeds National Electrical Manufacturers Association (NEMA) standards.

### 2.02 FINISHING PROCEDURE

- A. Procedure:
  - 1. Prior to the finishing operation all furniture shall be hand sanded, cleaned, and inspected for imperfections.
  - 2. The furniture shall be treated with a pre-stain conditioner to promote surface penetration of special formulated stains designed for maximum finish.
  - 3. Selected stain shall be applied on all visible surfaces in a uniform manner and allowed to dry.
  - 4. Catalyzed conversion sealer shall then be applied, allowed to dry, and sanded. Furniture is inspected for imperfections prior to application of topcoat. A topcoat of catalyzed conversion varnish shall then be applied.

## PART 3 - EXECUTION

### 3.01 EXAMINATION

- A. Inspect substrates and conditions under which the work of this section will be performed, and verify that installation properly may commence. Do not proceed with the work until unsatisfactory conditions have been resolved fully.
- B. Tolerances: Install products of this section to within the following tolerances:
  - 1. All joints to be vertical and A hairline  $\cong$  quality.
  - 2. All filler sections to fit tight and if necessary be scribed to adjacent surfaces.
- C. Complete installation to include modifications, necessitated due to field conditions, furnishing mechanical/electrical service fixtures as indicated on equipment list and all trim strips, fillers and hardware

### 3.02 ADJUSTING

- A. Final Adjustments: Upon achieving substantial completion of the work adjust all operable components to ensure that they are properly installed and functioning smoothly. Replace any component, which cannot be adjusted for proper operation.

### 3.03 CLEANING

- A. General: Institute protective procedures and install protective materials as required to ensure that work of this section will be without damage or deterioration at substantial completion.

## LIBRARY FURNITURE

### SHELVING

Construction: The shelving is modular and of demountable design to permit assembly, disassembly, and arrangement of component parts into different configurations and ranges. Each straight-line configuration consists of one initial unit and any number of additional units as shown on the plan.

Each initial unit consists of two end panels, a cornice, a fascia-double face shelving has two (2) fascias, front and back toe kick (double faced shelving also has a center toe kick) a base shelf (same design as adjustable shelf) and six adjustable shelves per face on 96" high, five (5) adjustable shelves per face on 82" high, four (4) adjustable shelves per face on 63" high, and two (2) adjustable shelves per face on 42" high shelving. Each additional unit consists of an intermediate panel, a cornice, a fascia - double face shelving has two (2) fascias, front and back toe kick (double faced shelving also has a center toe kick), a base shelf (same design as adjustable shelf), and six adjustable shelves per face on 96" high, five (5) adjustable shelves per face on 82" high, four (4) adjustable shelves per face on 63" high and two (2) adjustable shelves per face on 42" high shelving. Double-faced shelving has twice the number of base and adjustable shelves.

Alcott End Panel: The end panels shall be 1-5/16" thick, consisting of a 1-3/16" thick, 3-ply particleboard panel with premium grade "A" maple veneer face. The top and vertical edges shall be banded with 1-5/16" thick x2-1/2"W solid maple, with the vertical bands lapping the horizontal bands. The base shall be 2-1/4"H chemetal on three sides. All bands shall be flush on the inside face. All members shall be tenoned and doweled. All edges and corners are radiused 1/16".

Intermediate Panels: The intermediate panels are the same as the end panels except all the holes are through holes for both the cornice and toe kick attachment and for shelf adjustment. On 82" and 96" high intermediate panels there are twenty (20) 8mm through holes paralleling the shelf adjustment holes to allow placement of a shelf pin.

Cornice: The cornice assembly shall consist of a panel and a valance of 3/4" thick, 3-ply particleboard construction. The exposed edge of the panel and the bottom edge of the fascia shall be banded with solid maple. The fascia is recessed 1/8" and screwed to the panel with three (3) #10 x 2-1/2 FHW screws. The panel is recessed 1/8" from the edge of the upright and is secured by means of two (2) (three (3) for double faced shelving) fabricated 12 gauge steel brackets at each end secured to the cornice panel with two (2) 8mm x 5/16" long steel shear pins formed in the bracket and two (2) #12 x 5/8 PHSM screws. Each bracket is secured to the end uprights by means of two (2) M6 screws and to the intermediate uprights by means of 1/4-20 x 2 hex head bolts, flat washers and 1/4-20 nuts.

Toe kicks: All external or face toe kicks consist of a 4" high, 5 ply lumber core kick plate. Internal or back toe kicks consist of 3-ply particleboard construction with black thermally fused melamine on both faces. Each toe kick is secured by means of one (1) 12 gauge steel bracket at each end and to the uprights using the same method listed above except that the toe kick is locked in place to the upright with two (2) #12 x 5/8 PHSM screws.

**Mobile Shelving Units:** Mobile shelving is available in double faced 42"h shelving units only. Each unit is provided with (4) 14-gage stainless steel mounting brackets and (4) 2 1/2" diameter hard wheel casters with an overall height of 4 1/2".

**Base Shelf:** The fixed base shelves are 3/4" thick solid hardwood of same material and construction as adjustable shelves. Base shelves are identical to adjustable shelves.

**Adjustable Shelves:** All adjustable bookshelves are 3/4" solid glued up hardwood lumber. Shelf is of northern grown hardwood with no strips over 3" wide, and with a 2' wide nosing strip of select maple, matching case construction. The shelf is grooved the length of the shelf and fits over shelf pins to prevent accidental removal.

**Pivot Type Magazine Shelf:** The magazine shelf is 3/4" thick, 5-ply lumber core plywood. The front edge has a black aluminum extrusion retaining rail and is attached to the shelf using five (5) #6 x 2" PHSM screws. Shelves are adjustable and pivot on pins providing access to stored back issue below. In closed position, shelf is supported by two (2) shelf pins at front edge. Shelves are 13-3/4" deep and designed for use in 12" deep shelving sections.

**Wall Anchor Brackets:** Wall anchor brackets are provided on all 63", 82" and 96" high single faced shelving. #8 x 5/8 PHSM screws are provided to attach bracket to shelving, although the wall-anchoring device is not provided.

**Plywood Back Panels:** Panels are 1/4" thick plywood with maple veneer.

## CIRCULATION DESK SYSTEM

**Top:** All assemblies have continuous tops composed of longest sections possible. Joints are secured with splines and mechanical joint fasteners. Desktop is 1-1/4" thick, 3-ply particleboard construction with .050" high-pressure laminate on the face and .028" backer on the underside.

**Cabinet Construction:** All desk modules are flush front design of 3/4" solid panel construction. The front panels will be 3/4" thick, 3-ply particleboard construction with premium grade "A" maple veneer. Exterior face is matched for color and grain, and sequence matched across the complete assembly. Bottom edge of panel at toe space is banded with 1/8" thick solid maple. The 6"H recessed toe space is painted black as standard. The side panels will be 3/4" thick, 3-ply particleboard construction with select grade "A" maple veneer on interior face. All exposed edges at working side are banded with solid maple.

**Closed Base:** All closed base desk assemblies have a closure structure extending continuously across the front and back of the assembly to form a recessed toe space 6"H x 3"D. The bottom shelf is removable, providing access to all electrical and low voltage stub-ins.

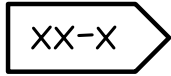

**Adjustable Shelves:** Adjustable storage shelves are 3/4" thick, 3-ply particleboard construction with select grade "A" maple face veneer and banded on one exposed edge with solid maple. Shelves are adjustable on metal K-V shelf supports routed flush into end panels with four clip-in metal shelf supports.

Hinged doors: Doors are  $\frac{3}{4}$ " thick, 3-ply particleboard construction with select grade "A" maple veneer on both faces, all four edges are banded with  $\frac{1}{8}$ " solid maple. Each door will be attached to the cabinet by means of two concealed 176-degree door hinges. Each door will be fitted with a pull and lock.

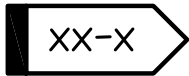

Storage Drawers: All drawer fronts are  $\frac{3}{4}$ " thick, 3-ply particleboard construction with select grade "A" maple veneer on the face and all edges. Drawer box is constructed of solid beech and beech plywood. Drawer bottoms are of  $\frac{3}{16}$ " thick beech plywood. All storage drawers operate on side mounted, ball bearing,  $\frac{3}{4}$ " extension drawer slides having a load bearing capacity of 60 lbs. per drawer.

## DICTIONARY STAND

The assembly shall consist of two end panels, a sloped top, a back, a bottom shelf and an adjustable shelf. All components shall be maple solids and veneers. The end panels shall be  $1\text{-}\frac{3}{8}$ " thick, consisting of a  $1\text{-}\frac{3}{16}$ " thick, 3-ply particleboard panel with the vertical edges banded with  $1\text{-}\frac{3}{8}$ " thick x  $2\text{-}\frac{1}{2}$ "W solid maple with a  $1\text{-}\frac{1}{16}$ " thick x  $2\text{-}\frac{1}{2}$ "W x  $2\text{-}\frac{1}{4}$ "H brushed metallic ferrule and a  $\frac{1}{4}$ " thick matching bead on four sides of the bottom edge. The top edge shall be banded with  $1\text{-}\frac{3}{8}$ " thick x  $1\text{-}\frac{1}{2}$ "W solid maple. The top rail shall be  $1\text{-}\frac{3}{8}$ " thick x  $2\text{-}\frac{1}{2}$ "W solid maple with  $\frac{3}{4}$ " thick x  $1\text{-}\frac{1}{2}$ "W x  $1\text{-}\frac{1}{2}$ "H brushed metallic block fretwork between the rail and band. The sloped top assembly shall have a plastic laminate facing and an arched solid hardwood-retaining strip located on lower edge. The adjustable storage shelf shall be  $\frac{3}{4}$ " thick with a  $1\text{-}\frac{1}{2}$ "H book stop at the back edge. All edges and corners are radiused  $\frac{1}{16}$ ". The assembly shall have adjustable leveling glides.

**NOTE:** Above totals were obtained by correctly multiplying vendor unit pricing by the number of units as specified on the written quantities of each item for each building.  
 Numerous corrections were required to bidder submittals due to clerical mistakes and bidders using number of items as per drawings.  
 Exceptions to the recalculations are the bid from NBS pertaining to Costello (no detail provided) and to the entire bid from McDonalds (unable to reconcile vendor provided information to total bid).
