3-Reduce Days Missed

Add a Science Lab

Math Space- free trial run, license if free this year; look at allocation of the Aleks money. How do we spend it?

Emergency Preparedness Plan Review by Steve Geisler as follows:

There will be four drills a year; two fire drills, one earthquake drill and one lock down drill. Could an email be sent out to parents after the earthquake drill and lock down drill. So parents can talk about it at home with their students. The LDS church is the evacuation site if needed. Parents would need to come get their students at the evacuation site using the check out policy. Community Council parents

should control social media, check the PTSA page and the Legacy Jr High Administration Face book Page. In case of an emergency the district would put out a notification call thorough their calling system
