

Important Information on Law Requiring MCA Scores Be Used for Course Placement

Mathematics Career and College Readiness (CCR) and Use of High School MCA Scores by Minnesota State Colleges and Universities

Minnesota Statutes, section 120B.30 indicates that Minnesota State Colleges and Universities may use high school MCA reading and mathematics scores to assist in determining course enrollment by the 2018–2019 school year.

An analysis has been conducted by Minnesota State to identify the scores to be used.

- Students who are at or above an identified score are expected to be able to successfully complete credit-bearing coursework without the need for remediation at a two- or four-year college or university, or other credit-bearing postsecondary program. These students must not be required to take a remedial, noncredit course in the corresponding subject area.
- Student scores below the identified score indicate that the student’s performance is not on track to meet career and college readiness, and additional information is necessary for course enrollment.

The table below shows the course type and scores identified by Minnesota State Colleges and Universities.

Intended Course of Enrollment (or equivalent)	Enrollment in Developmental Course Unless Additional Information Indicates Otherwise	Need More Information on Readiness	Enrollment in College Level Course
College Algebra	1151 and below	1152–1157	1158 and above
Statistics	1145 and below	1146–1147	1148 and above
Other mathematics	1145 and below	1146–1149	1150 and above
Reading Intensive	1041 and below	1042–1046	1047 and above

To support districts in this monitoring, student progress scores for grades 3–8 and student career and college readiness (CCR) scores for grades 10 and 11 are provided for reading and mathematics on Individual Student Reports (ISRs) and District and School Student Results (DSR and SSR) files. Goal scores have been established for both student progress scores and student CCR scores to compare whether students are on track to pass a college entrance exam by the end of grade 11.

MDE will continue to include a high school Career and College Readiness Score for grade 10 reading and grade 11 mathematics MCA. A student whose MCA score is at or above the Career and College Readiness Score is on track to demonstrate career and college readiness in reading or mathematics on a college admissions test at the end of grade 11.
