# Literacy Audit

Designed to address district specific questions, this service can provide a pulse on current K-12 literacy programs.

The audit process can be completed with a focus on curriculum alignment, resource implementation, assessment data or program status. Wayne-Finger Lakes BOCES personnel will work with district personnel to develop a framework that meets the districts' needs.

Interested Districts need to contact  
W-FL BOCES Director of Staff Development, Jessica Sheridan,  
to secure this service.

Pricing will vary based on district needs.

**Jessica.Sheridan@wflboces.org 315-332-7490**

## Zearn Math Support Service

Zearn Math is a free comprehensive learning experience that engages students in Kindergarten - Grade 5 in both adaptive digital content and small group targeted instruction with a teacher to help maximize the potential for all students to learn and love math. Zearn is based on the NYS Engage NY Math Modules by Eureka Math Inc. and was built by teachers to be a part of your daily core math time.

To help maximize the Zearn Service, Andy Mitchell, Wayne-Finger Lakes BOCES Coordinator of Regional Math Initiatives, will work with districts to provide:

- Kick-off training for teachers and administrators (one day in-district)
  - Introduce the program and how it can maximize student learning
  - Highlight examples on how to increase classroom personalization through individualized lessons and student data reports
  - Brainstorm ways to make math block planning more efficient
- Year-long consultation with building and district level leaders to maximize the impact of Zearn
- Year-long coaching of teachers with a focus on data management and targeted instruction within the Zearn instructional framework
- Additional support as needed, based upon identified school needs

### 2018-2019 Cost:

- 5 days of in-person support and coaching with Andy Mitchell = \$3,900
- Zearn Math Administrative Tools Add-On Package (\$2,500 per school)
  - Licenses (and pricing) are by school, which gives administrators access to building-level student learning data.
  - Zearn school licenses run from July 1 through June 30.
- Additional in-district coaching days can be purchased as needed, based on identified school needs.

Interested Districts should contact W-FL BOCES Director of Staff Development  
([Jessica.Sheridan@wflboces.org](mailto:Jessica.Sheridan@wflboces.org))

# Therapeutic Crisis Intervention for Schools

Cornell University developed the Therapeutic Crisis Intervention (TCI) model for residential care as part of its Residential Child Care Project in the early 1980's. The foundations of this curriculum are in research based literature and programs. In 2007 Cornell responded to requests from various Board of Cooperative Education (BOCES) Centers and other public schools and adapted the TCI curriculum to meet the needs of schools. Therapeutic Crisis Intervention for Schools (TCIS) gives WFL BOCES a framework for implementing a crisis prevention and management system that reduces the need to rely on high-risk interventions, complements the Response to Intervention (RTI) approach and includes aspects of trauma informed care.

There are three main competencies taught in the TCIS Training:

- Competency 1: Prevent and de-escalate potential crises with students
- Competency 2: Safely and therapeutically manage crisis situations
- Competency 3: Be able to process with students to help improve their coping skills

There are three levels of certification:

- Level 1: Verbal de-escalation skills including the Life Space Interview (initial training of 21 hours)
- Level 2: Verbal de-escalation, LSI and TCIS protectives (initial training of 24 hours)
- Level 3: Verbal techniques, protectives and physical restraint techniques (initial training of 28 hours)

*Furthermore, TCIS requires between 10 and 12 hours of refreshers annually, including on-going evaluation and formal assessments to maintain certification.*

**MORNING BEVERAGES PROVIDED, LUNCH IS ON YOUR OWN**

**SEPTEMBER DATES:**

September 25, 26, 27, 28, 2018

**TIME:**

8:00 - 4:00

**Audience:**  
K-12 Teachers

**Category:** Pedagogy

Morning beverages provided  
lunch is on your own.

As we work to prepare our students for an unknown future, we are challenged with meeting the needs of our diverse learners. A student-centered instructional approach allows educators to better meet the individual needs of students. In turn, students develop the skills that are critical to higher-level thinking and problem-solving, all while developing independence. In other words, students become empowered over their learning. During this workshop, participants will gain a foundational understanding of personalized learning through:

- Using evidence to inform instructional decisions
- Targeting instruction to meet the needs of varying learners
- Leveraging the use of technology
- Empowering student ownership

***This session is for teachers new to personalized learning.***

***Please plan to bring a device and earbuds.***

Registration is now live through Wayne-Finger Lakes BOCES

# Understanding the Life Space Interview

This workshop is for participants who have an interest in the concepts of Therapeutic Crisis Intervention strategies as they relate to the use of verbal communication skills and the Life Space Interview in dealing with students with challenging behaviors. The LSI is a powerful tool to develop a relationship with students while teaching self-regulation and values. It is a trauma-sensitive tool to engage with students about difficult situations as a way to help them develop an understanding of their own feelings and develop new or better coping strategies.

These hours will count toward required refresher hours to maintain TCIS certification.

Registration is now live through Wayne-Finger Lakes BOCES

# Making meaning of challenging behaviors - How do I best respond?

This workshop is for participants who have an interest in the concepts of Therapeutic Crisis Intervention strategies and verbal communication skills as they relate to students with challenging behaviors. Behaviors and needs of our students go together and their behaviors are an expression and/or an attempt to meet a need.

With the understanding that all behavior has meaning, staff will explore the effects of trauma on a student to develop an understanding of the importance of the environment and our response to the student. Materials that supplement TCIS concepts will be used.

These hours may count toward required refresher hours for maintaining TCIS certification.

Registration is now live through Wayne-Finger Lakes BOCES

## Language Acquisition Through Motor Planning (LAMP)

Language Acquisition through Motor Planning (LAMP) is a therapeutic approach based on neurological and motor learning principles. The goal is to give individuals who are nonverbal or have limited verbal abilities a method of independently and spontaneously expressing themselves in any setting.

LAMP was developed out of the clinical practices of John Halloran, MS, CCC-SLP, Cindy Halloran, OTR/L, and Mia Emerson, MS, CCC-SLP. In their interactions with nonverbal individuals with autism, they found that:

- Giving individuals access to core words on a speech-generating device
- Teaching those words in sensory-rich activities, and
- Accessing each word on the device with a consistent, unique motor pattern with auditory feedback provided a means for developing independent communication.

Language and social interaction may be affected by impairments in motor skills and auditory and sensory processing. Some interventions currently in use with individuals with autism focus on the perceived strengths associated with autism, such as visual learning and the desire for structure.

The LAMP approach not only utilizes visual learning and the desire for structure, but it also addresses core deficits affecting language delay to improve spontaneous, generative communication.

LAMP strives to improve language and communication by:

- Imitating the neurological processes associated with typical speech development
- Pairing a consistent motor movement with consistent auditory feedback and a natural response while using a speech generating device.

There are no cognitive prerequisites for the implementation of LAMP as intervention can begin at the cause and effect level and systematically build upon the stages of natural language development.

## Math and Instructional Technology Integration (Grades 3-12)

Do you have access to technology tools, but don't know how to best apply them in your math instruction? Then this session is for you.

In this session, you will be given the opportunity to explore various technology tools and applications to enhance your math lessons and provide an engaging learning experience for your students.

Please bring your own device or borrow a laptop and come prepared to explore applications such as Nearpod, Google Classroom, SMART Labs, and a variety of apps. You will leave with materials which will help you be ready to apply these tools for the upcoming school year.

# Student Empowerment Series

## Grades K-12

For years educators have focused on student engagement. This highly interactive series of workshops is designed to help teachers understand the leap that is required to move towards Student Empowerment.

Participants will take an in-depth look at a Student Empowerment Tool and develop an understanding of various levels of student engagement. Educators will know the difference between “engagement” and “empowerment” and learn about strategies and structures that support student empowerment.

Each session will look closely at individual elements of the tool such as Student Reflection, Goal Setting, Engaging with Technology and Collaboration. The series will provide ample opportunities for teachers to walk away with strategies to “try out” in their classrooms and to reflect and receive peer feedback on their work.

***Please bring an upcoming lesson(s)/unit(s), an electronic device, and earbuds.***

# Guided Reading: The Before, During and After

Guided Reading is a component of a balanced literacy program where a group of students come together to read and understand a text. This full day session will focus on the structure of the guided reading lesson, teaching strategically, selecting texts and planning the new book orientation.

Participants will learn how the running record and observational notes drive the teaching and planning of the guided reading lesson. Come bring your expertise and your knowledge of your students to think about the before, during and after of your guided reading groups!

Grades 6-12 ELA Teachers

**Category:** Pedagogy

Morning beverages provided  
lunch is on your own

Students require the development of advanced literacy skills and competencies that enable both spoken and written communication, in increasingly diverse ways and with increasingly diverse audiences.

During this workshop, we will learn how to leverage the Instructional Practices for Advanced Literacies included in the Next Generation ELA Standards in a personalized manner for students. Participants will learn about the 4 Hallmark Briefs that encompass these strategies and collaboratively plan personalized instruction. Teachers will apply their learning by infusing the strategies in an upcoming lesson(s) or unit.

***Please bring an upcoming lesson(s)/unit(s), an electronic device, and earbuds.***

## Social Studies 9-12 Cohort Collaboration

This forum will offer grades 9-12 teachers and instructional coaches the platform for collaboration to address NYSED updates, curriculum, instruction, and best practice for Social Studies.

These sessions will provide opportunities to work together to examine the Social Studies Framework and student work. Participants will be given time to discover ways to augment current units, lessons, and instructional practices.

This is an opportunity for Teachers, Teacher Leaders, and Grade Level Coordinators to be empowered as liaisons to keep colleagues apprised of current, researched practices as well as updates from the Social Studies Statewide Group.

Registration is now live through Wayne-Finger Lakes BOCES

K-12

**Category:** Pedagogy

## Wayne-Finger Lakes BOCES Online Book Studies - Making Success Possible: My Learning On My Time

“We believe that everyone can and should learn mathematics. We believe that numbers and the mathematics we use to make sense of them are amazing and beautiful....

This book is about teaching ideas in ways that propel students into the beauty, logic, usefulness, and joy of mathematics.” Preface to Visible Learning for Mathematics, Grades K-12: What Works Best To Optimize Student Learning, by Hattie, Fisher, Fry et al.

Almost every intervention has a positive impact on student learning. This book will highlight those approaches that have been demonstrated to turbocharge growth.

You will have the opportunity to read and apply what you have learned to your work before the end of our time together. We will develop a collaborative and empowered learning community (collective teacher efficacy effect size 1.57).

***You will receive 14 CTLE hours upon successful completion of this online book study.***

## Maximizing Teacher Mentors

“The purpose of the mentoring program shall be to provide support for new teachers in the classroom teaching service in order to ease the transition from teacher preparation to practice, thereby increasing retention of teachers in the public schools, and to increase the skills of new teachers in order to improve student achievement in accordance with the State learning standards.” NYSED Part 100 Regulations

When asked to serve as a mentor teacher, one is being asked to share their expertise and skill as an accomplished teacher to help transition a colleague into the culture and norms of your district. While an honor, mentor teachers often find themselves wearing multiple hats such as tour guides, cheerleaders, counselors... all while maintaining their true hat of teacher. Participants in this session will spend time reviewing the skills necessary to support new teachers, gain ideas for how to maintain a balance with their support and practice having conversations with others in the room to leverage 2-way communication with mentees.

# From Engaged to Empowered - Increasing Student Agency Grades K-12

This workshop is meant to challenge educators in thinking about how to provide a truly student-centered learning environment. It is not about “doing something better” but more about “doing something different” in order to cultivate a love and enthusiasm for learning. This will yield higher levels of student achievement and outcomes that are relevant to the students themselves.

Participants will be introduced to a Student Empowerment Tool and will develop an understanding of varying levels of engagement. We will focus on the difference between “engaged” and “empowered” levels of learning. Strategies and structures that support student empowerment will be identified and discussed.

Educators will walk away with ideas about how to increase student agency as well as how to plan so that students become truly empowered learners.

***Please bring an electronic device and earbuds.***

## **PUFM: Profound Understanding of Fundamental Mathematics, BLENDED in person and on-line course**

“[P]rofessional development that focuses on the enhancement of content knowledge is linked to improvement in student mathematics achievement.” Saxe, Gearhart, & Nasir, 2001

Elementary mathematics is anything but elementary. The foundations of lifelong mathematical thinking and reasoning are built and supported through 6th grade.

If you are an elementary teacher, or you support elementary math instruction, and you would like to increase your understanding of elementary mathematics in a safe and supportive atmosphere, then this blended session is for you.

First, we will meet together for a full day of problem solving and learning. Then, we will continue to collaborate virtually through a series of collaborative online experiences.

At the end of this course, you will have a deeper understanding of elementary mathematics and will be able to personalize your instruction for your students more effectively because you will know how your curriculum fits into the bigger structure of elementary mathematics.

## Instructional Coaching Series

With the increasing demands being placed on teachers and administrators, many schools have looked to create new structures of support. Instructional Coaching is a model in which teachers are asked to step out of the classroom to provide targeted support, ideas, and resources to their colleagues. This workshop is designed to provide support for those Instructional Coaches in order to maximize their time and impact.

During this four-day series, Coaches will be asked to review a variety of resources around the impact of instructional coaching and how to maximize time with teachers. Collaborative conversations will be encouraged so that Coaches have a safe environment in which to share both peak moments and pitfalls. An opportunity will also be given for participants to set a personal goal around their role as a coach and take a deep dive into how to become stronger and more confident in their craft. Ultimately, the series will be designed based on the needs of the participants as they progress throughout the school year.

lunch is on your own.

Wayne-Finger Lakes BOCES is pleased to offer key learning and additional insights from the Next Generation Learning Standards Conferences being held across NYS. Please join us for an interactive day of learning and conversation that targets our region's unique needs. Sessions will include, but are not limited to:

Opening Keynote based on the work of Dr. Lesaux  
Let Me Introduce Myself:

- The Next Generation Mathematics Learning Standards Introduction
- The Next Generation English Language Arts Learning Standards Introduction

### Breakout Sessions (Choice of Two 75-minute Breakouts)

- Let's Talk Crosswalk: How to Utilize the NYS Next Generation Mathematics Learning Standards Crosswalk
- Standards and the Instructional Cycle: A Tool for Prekindergarten-Grade 3
- The Lifelong Practices for Readers and Writers: What Are The Practices And How Should They Be Implemented In The Classroom?
- Standards, Not Standardization
- Plus Others!

Closing Conversation and Next Steps

***\*Please note: This is the same session as was held by W-FL BOCES in March 2018 and similar to the statewide events held in Saratoga and Rochester.***

# Therapeutic Crisis Intervention for Schools

Cornell University developed the Therapeutic Crisis Intervention (TCI) model for residential care as part of its Residential Child Care Project in the early 1980's. The foundations of this curriculum are in research based literature and programs. In 2007 Cornell responded to requests from various Board of Cooperative Education (BOCES) Centers and other public schools and adapted the TCI curriculum to meet the needs of schools. Therapeutic Crisis Intervention for Schools (TCIS) gives WFL BOCES a framework for implementing a crisis prevention and management system that reduces the need to rely on high-risk interventions, complements the Response to Intervention (RTI) approach and includes aspects of trauma informed care.

There are three main competencies taught in the TCIS Training:

- Competency 1: Prevent and de-escalate potential crises with students
- Competency 2: Safely and therapeutically manage crisis situations
- Competency 3: Be able to process with students to help improve their coping skills

There are three levels of certification:

- Level 1: Verbal de-escalation skills including the Life Space Interview (initial training of 21 hours)
- Level 2: Verbal de-escalation, LSI and TCIS protectives (initial training of 24 hours)
- Level 3: Verbal techniques, protectives and physical restraint techniques (initial training of 28 hours)

*Furthermore, TCIS requires between 10 and 12 hours of refreshers annually, including on-going evaluation and formal assessments to maintain certification.*

## Regional Mathematics Leadership Cadre

The Center for Professional Development and Education Reform, in partnership with Wayne-Finger Lakes BOCES, is once again offering an opportunity for teachers, teacher leaders, math coaches, and administrators to come together to learn, share resources and ideas, and provide support to each other as we work to successfully implement high quality mathematics instruction for K-12 students. To embrace the shifts, challenges, and progress in mathematics education today, it is crucial that we, as a region, work in collaboration to best serve our school communities while staying at the forefront of the latest research. New and returning members will:

- come to a deeper understanding of the mathematics within the Common Core Learning Standards and prepare for the Next Generation Learning Standards as we explore the implications on teaching, learning and assessment;
- stay up to date with the latest information from the field at regional, state and national levels, tapping into regional and national expertise;
- collaborate with each other by sharing strategies and materials to support the implementation of high quality mathematics;
- engage in cross-grade level and cross-district collaboration;
- use current literature and research to inform our work with a focus on **equity in mathematics**;
- participate in experiences as learners in mathematics to develop new images of mathematics teaching and learning.

Join us for an opportunity to network with others in our region, to share our successes and ideas for improvement, and to share our experiences as we work to improve mathematics instruction for all.

## Using the Speaking and Listening Standards to Better Implement the Lifelong Practices of Readers and Writers

What are the practices and how are they related to the seemingly forgotten Speaking and Listening standards?

Using the Speaking and Listening standards as a lens, participants will take a deep dive into the practices to determine what they are, what they can look and sound like in the every day classroom, as well as the instructional moves that are critical to ensure that the practices are present. Additionally, participants will have time to delve into the crosswalk of the Next Generation Standards for ELA.

*Students pass or fail classes based upon data.*

*Teachers' and principals' APPR scores are based upon data.*

*Schools and districts are rated based upon data.*

*But people are so much more than a number!*

Learn how to use your data as a tool to improve instruction. See how to use data in a healthy way with your students, teachers, and community. Hand off data responsibility to children and teachers from kindergarten through 12th grade.

Please bring your questions and concerns. Samples of student work will be useful as well. We will review examples of your summative and formative assessments to help build a classroom and schoolwide system which increases student ownership and improves student learning.

Activities will be differentiated to meet the varying needs of participants at all grade levels. The specifics may vary, but the general principles of healthy data usage stay consistent no matter who you teach or supervise!

## Building a Mathematics Coaching Cadre to Foster Teacher Leadership

*Please join us for three engaging days with a focus on fostering  
teacher leadership through mathematics coaching.*

During our time together, we will provide targeted support to coaches, math specialists, instructional leaders and coaching program leaders on how to use coaching as a strategy to improve student learning. We will bring together new and experienced mathematics coaches from across schools, districts, and grade levels to work on refining their coaching practices and programs. Participants will have the opportunity to engage in powerful learning experiences to develop the art of coaching through robust discussions, practical experiences and the examination of case studies and current research. All participants will be encouraged to apply the content of these professional learning experiences to their own coaching practice. During our time together, we will build a community that can share resources and materials and openly discuss current successes and challenges in our coaching roles.

# Take, Analyze and Use a Running Record for Successful Reading Instruction

Come learn how to code a student's reading behaviors! Then analyze the cueing systems used or neglected for patterns of responding. Take this knowledge to the next level by aligning it to your teaching, prompting and feedback to the student. See how the running record provides the data which will drive the instruction in your guided reading groups.

# TCIS Core Refresher

with a focus on  
**Trauma Informed Schools**

*(Includes verbal de-escalation, the Life Space Interview, and Protective Interventions)*

In this workshop, the core concepts of TCIS will be reviewed which include: behavior support techniques, emotional first aid, stress model of crisis, help me help myself, crisis co-regulation, power struggle, and the Life Space Interview. These core concepts will be presented with supplemental information as it relates to Trauma Informed School. Protective intervention techniques and the Life Space Interview will be reviewed. Participants will receive documentation of refresher hour completion.

## Putting Students in the Driver's Seat

This workshop targets effective ways to shift ownership of questioning, learning, and demonstrating from teacher to student.

Participants will unveil the impact of inquiry, clear communication, and raised expectations for student learning and student agency.

The format of the workshop will model student autonomy and will address the Core Four of Personalized Learning: Flexible Content and Tools; Targeted Instruction; Data Driven Decisions; and Student Ownership and Reflection.

## **TCIS Core Refresher** **with a focus on** **Trauma Informed Schools** *(Includes verbal de-escalation and physical restraints)*

This refresher workshop is for participants who have already received their initial TCIS certification and are seeking the required refresher hours to maintain certification. In this workshop, the core concepts of TCIS will be explored. This will include reviewing the concepts of developing an ICMP, de-constructing a crisis, reviewing the stress model of crisis and choosing a safety intervention. These core concepts will be presented with supplemental materials as it relates to Trauma and pain-based behaviors. Physical restraints will be reviewed and practiced for proficiency. Participants will receive documentation of refresher hour completion.

Morning beverages provided  
lunch is on your own.

No matter how hard you work with your students, there are certain topics that always give us trouble.

If you would like to collaborate with other math teachers from around our region to discuss successful approaches and review practices which can help everyone in your classes, from accelerated to struggling students, then sign up for this session today!

Participants will review regional Regents data, explore the most difficult test items, and develop a list of the most challenging topics, by course, collaboratively.

After reviewing the Standards for Mathematical Practice, we will work together to share best practices for high school math lessons and develop plans to help teach these difficult topics.

Algebra I and II and Geometry Regents teachers are invited to this session. You will leave with lesson ideas to help you work with your students on those most challenging topics.

# From Engaged to Empowered - Increasing Student Agency 2.0 Grades K-12

This workshop is a follow up to “From Engaged to Empowered - Increasing Student Agency.” Participants will become reacquainted with the Student Empowerment Tool and take a deeper dive into student empowerment and how students look when they are empowered over their learning.

Educators will work through two or more of the elements from Student Empowerment Tool (Student Learning, Reflection, Goal Setting, Engaging with Technology and Collaboration) and identify strategies that will increase student agency.

Participants will walk away with specific ideas about how to increase student empowerment within specific lessons as well as how to provide a classroom culture that promotes risk-taking and student agency.

***Please bring upcoming lessons/units, an electronic device and earbuds.***

# Increasing Student Agency in the Math Classroom Grades K-12

In this content-specific workshop, teachers will be introduced to a Student Empowerment Tool that provides descriptors of varying levels of student engagement and empowerment. Participants will analyze classroom scenarios using the tool. We will explore ideas that will increase student agency and identify specific strategies to foster student empowerment within the scenarios.

Teachers will review the data tools available on personalized platforms like Zearn, IXL, iReady, AIMSweb, Khan Academy, and other individualized skill-building tools to target instruction and provide students ways to track their own learning.

Teachers will apply their learning towards an upcoming unit and/or lesson. Participants will walk away with an "action bank" of strategies to improve student agency as well as a lesson and/or parts of a unit that includes strategies from the action bank.

***Please bring an upcoming lesson(s)/unit(s), an electronic device, and earbuds.***

# Therapeutic Crisis Intervention for Schools

Cornell University developed the Therapeutic Crisis Intervention (TCI) model for residential care as part of its Residential Child Care Project in the early 1980's. The foundations of this curriculum are in research based literature and programs. In 2007 Cornell responded to requests from various Board of Cooperative Education (BOCES) Centers and other public schools and adapted the TCI curriculum to meet the needs of schools. Therapeutic Crisis Intervention for Schools (TCIS) gives WFL BOCES a framework for implementing a crisis prevention and management system that reduces the need to rely on high-risk interventions, complements the Response to Intervention (RTI) approach and includes aspects of trauma informed care.

There are three main competencies taught in the TCIS Training:

- Competency 1: Prevent and de-escalate potential crises with students
- Competency 2: Safely and therapeutically manage crisis situations
- Competency 3: Be able to process with students to help improve their coping skills

There are three levels of certification:

- Level 1: Verbal de-escalation skills including the Life Space Interview (initial training of 21 hours)
- Level 2: Verbal de-escalation, LSI and TCIS protectives (initial training of 24 hours)
- Level 3: Verbal techniques, protectives and physical restraint techniques (initial training of 28 hours)

*Furthermore, TCIS requires between 10 and 12 hours of refreshers annually, including on-going evaluation and formal assessments to maintain certification.*

# **BOCES 4 SCIENCE** **UNIT WORKSHOPS**

**2018-2019**  
**School Year**

**Teacher training on new elementary science units that were written specifically to address the recently adopted NYS PreK – 12 Science Learning Standards have been scheduled for the 2018-2019 School Year!**

Join the BOCES 4 Science educators for comprehensive professional development sessions that will include specific information on the appropriate grade level NYSSLS topic, 3-Dimensional instructional strategies specific to this topic, current formative and summative assessment for the unit, content instruction and more. Teachers will walk away prepared to begin instruction using the new science standards.

- **Click on the links in this document to register for any of the BOCES 4 Science Workshops. Registration will be on My Learning Plan (MLP). Exact locations of workshops will also be listed on MLP. There is no cost to attend these trainings.**

## **BOCES 4 SCIENCE WORKSHOPS—GENERAL**

The general science workshops BOCES 4 Science will offer during the 2018-19 school year will help teachers have a better understanding of the NYSSLS and how to implement them in their classrooms.

Three-Dimensional assessment will also be addressed, as well as STEM education. Please see the information below for dates and times for each workshop.

⇒ **Audience:** Any K-12 Teachers of any content area

⇒ **Cost:** Free to district members of regional science curriculum writing, all others \$125.00 per person

<p><b><u>Exploring 3D Assessments in Science</u></b></p> <p>What will future formative and summative assessments be like for students? What are other states doing right now? Participants in this session will have an opportunity to explore the 3 Dimensions: Science &amp; Engineering Practices; Disciplinary Core Ideas; and Crosscutting Concepts and formulate specific formative and summative assessments for their own grade level. Current information about the NYS Science Roadmap will be shared.</p>	<p><u>11/13/18</u></p>	8:30-3:30	Monroe 1 BOCES	
	<p><u>11/15/18</u></p>	8:30-3:30		Monroe 2 BOCES

## **BOCES 4 SCIENCE WORKSHOPS—GENERAL, cont.**

<b><u>Title of Workshop and Description</u></b>	<b>Date</b>	<b>Time</b>	<b>East Side Location</b>	<b>West Side Location</b>
<b><u>STEM and the NYSSLS</u></b> Before there were the New York Science Learning Standards (NYSSLS), before there were the Next Generation Science Standards (NGSS), there was STEM. The focus on STEM came about as educational leaders realized that many of tomorrow's jobs would involve the integration of Science, Technology, Engineering and Math. STEM is now part of our new science standards and how STEM fits into these standards is the focus of this workshop. Through hands-on activities and discussion, we will discover the many ways in which NYSSLS asks science teachers to incorporate Engineering and Technology into their instruction. If you have a favorite STEM activity, come ready to share, and we will assess its correlation to the New York State Science Learning Standards.	<u>10/16/18</u>	8:30-3:30	Wayne Finger Lakes BOCES	
	<u>3/7/19</u>	8:30-3:30		Monroe 2 BOCES

<b><u>Title of Session and Description</u></b>	<b>Date</b>	<b>Time</b>	<b>East Side Location</b>	<b>West Side Location</b>
<b><u>BOCES 4 Science Showcase of Units</u></b> Plan to attend this informational meeting about elementary science (K-5) units that have been developed based on the new NYS Science Learning Standards (NYSSLS). Over the past 3 years, teachers from districts throughout our region have convened for professional development and the creative endeavor of writing a new science unit tied to one of the NYSSLS topics for each grade. This session will provide a brief overview of the important shifts in science instruction, our unit development process, and the Standards addressed. Participants will have plenty of time to ask questions and review the newly published teachers guides.	<u>9/19/18</u>	1:00-3:00		Genesee Valley BOCES
	<u>11/14/18</u>	1:00-3:00	Wayne Finger Lakes BOCES	
	<u>12/17/18</u>	1:00-3:00		Monroe 2 BOCES
	<u>1/18/19</u>	1:00-3:00	Monroe 1 BOCES

## My Learning Plan

Wayne-Finger Lakes BOCES has now gone live with My Learning Plan (MLP) for our Professional Development registration system!

To access our offerings:

- Current MLP users will be able to pull the Wayne-FL BOCES Catalog into your system
- Non-Current MLP users, the easiest way will be to access our offerings through one of the links from our flyers.

- Follow the prompts on the screen to register for the offering(s) of your choice.
- Once registered you will see this screen:

▼ Confirmation

Registration Submitted

▼ Registration Instructions

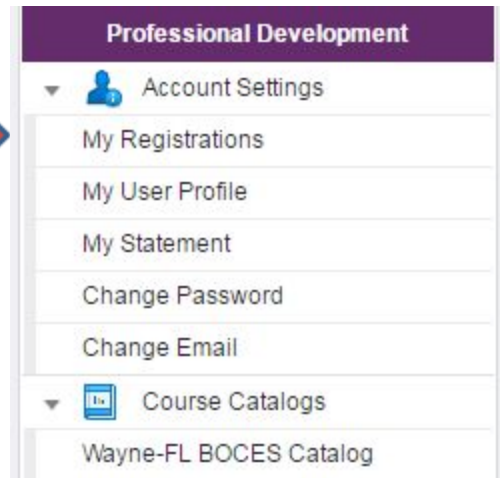

Your registration will **NOT** be complete until you gain district level approval using the official enrollment form.

Please print out the enrollment form and obtain that required approval. When finished, FAX the form to 315-332-2117 OR e-mail to johora@wflboces.org. If you need to cancel the registration, please notify Jacqui O'Hora at 315-332-7329 or johora@wflboces.org

MLP Districts - please follow your internal process for completing registration.

Non-MLP Districts - please follow the process outlined below to complete registration

To access the Enrollment Form, click on My Registrations.

Find the course that you just enrolled in and click on the title (it should be under Pending Courses).

Scroll to the bottom and click Print Enrollment Form.

Print the form and have an administrator (building or district level – district discretion) sign off on the registration and then e-mail or fax to Wayne-Finger Lakes BOCES Professional Development Registrar, Jacqui O’Hora @ 315-332-2117 / [jacqui.ohora@wflboces.org](mailto:jacqui.ohora@wflboces.org)

# Print My Certificate

[pd-help.frontlineeducation.com/hc/en-us/articles/115004313368-Print-My-Certificate](https://pd-help.frontlineeducation.com/hc/en-us/articles/115004313368-Print-My-Certificate)

For documentation purposes, it is a good idea to have a copy of a certificate from an activity for your files. If the activity that you attend has a print certificate option, please follow these steps to print.

1. Log into your Frontline Education (My Learning Plan Account)
2. From the home page, the **"My Professional Development"** should have multiple sections with workshops that you have registered for listed under one:
  - a. Completed
  - b. Enrolled
  - c. Incomplete Pending
3. To obtain your completion certificate, the course must be under the **Completed Section**
4. Click on the course **(blue activity link)** you are looking for
5. Towards the bottom of the page look for Actions
6. Click on Print Certificate
7. You should now be able to print or save your completion certificate

Start Date	Activity Title	Credit Type
<b>Completed (6 Records)</b>		
12/12/2013	Nassau County Interagency Transition Teams	3.00 hr
10/18/2013	Alternate Pathways and New Graduation Options for Students with Disabilities	3.00 hr
10/22/2013	Transition Assessment to Inform the Development of the IEP	6.00 hr

**The activity status dialog box opens with all information pertaining to that activity.**
