**FIGHT
THE
FLU**

THE FLU IS A CONTAGIOUS DISEASE THAT CAN BE SERIOUS.

- Millions of Americans get the flu each year
- People with the flu sometimes need to be hospitalized and may die of flu complications

"TAKE 3" TO HELP PROTECT YOURSELF AND OTHERS AGAINST THE FLU

#1: Take time to get a flu shot

- Vaccination is the best way to help prevent getting the flu
- People 6 months of age and older should get vaccinated every year; ask your doctor where to get the flu shot

#2: Take preventive actions to stop the spread of germs

- Cover your mouth and nose when you cough or sneeze
- Frequently wash your hands with soap and water
- If you are sick, stay at home for at least 24 hours after fever is gone

#3: Take flu medications if your doctor prescribes them

- Prescription flu medications can help stop the virus from spreading and shorten the time you are sick
