

Foundational Principles of Northshore Family Partnership

Parent Responsibilities:

1. **Parent's Role in Written Student Learning Plan.** The Written Student Learning Plan (WSLP) details the learning goals for each child during the school year. Parents are responsible for meeting with their assigned WSLP advisor before classes start to go over their WSLP. Each month, parents are responsible to meet with and submit monthly progress reports and work samples to their WSLP advisor.

2. **Parents as Primary Educators.** Parents who enroll in this program are opting to homeschool their children. Parents have the responsibility to provide instruction that meets grade level standards set by the state. They are free to select methods, materials, and any secular curriculum of their choice to teach foundational academic skills to their children. Any curriculum not provided by Northshore School District will be the parents' responsibility to purchase.

Northshore School District (NSD) and Northshore Family Partnership (NFP) Responsibilities:

1. **Classroom Instruction.** Teachers' classroom instruction will focus on child led learning, project based learning, and collaborative work in order to build on the skills students are learning at home with their parents as primary educators.

2. **Teacher's Role in Written Student Learning Plans Advising.** WSLP advisors (NFP teachers) will meet in partnership with parents at the beginning of the year to create the WSLP and will be responsible for verifying the learning goals for the year are in compliance with grade level state standards. WSLP advisors will meet with parents monthly to review the WSLP and discuss the monthly progress report. If requested, teachers will mentor parents and support them in the instruction they are providing for their children at home. **WSLP advisors are responsible for assessing whether a student is or is not making progress towards grade level state standards and indicating their assessment on the monthly progress reports. Advisors also have the responsibility to recommend and oversee an intervention plan if students are not making adequate progress.**

3. **Curriculum Provided by NSD.** The district will provide parents the option of accessing hardcopy and electronic NSD approved curriculum for parents to utilize at home with their children.

OSPI Oversight: All WSLPs, monthly progress reports, work samples, and all other documents required of an ALE in compliance with state law will be collected and stored to provide the required documentation to OSPI as outlined in WAC 392-121-182 items 9-10.
