

The teachers of Oakwood Schools are in full support of the Master Facilities Plan. It has a well-planned timeline, balancing the need for addressing short-term infrastructure needs and long-term plans for upgrading our beautiful buildings. Since teachers in Oakwood Schools will spend the majority of their careers in Oakwood school buildings, we have a vested interest in working in well-maintained facilities. Our combined experience indicates that students do their best learning in safe buildings with an environment kept at consistent temperature. We are excited by the new opportunities Oakwood students will have available to them in the future. We appreciate the administration including our thoughts and concerns throughout the development of the plan, and look forward to the completion of the projects.

Jay Lane

Oakwood Teachers' Association, President
