# PREPARING FOR SECONDARY SUCCESS IN MIDDLE AND JUNIOR HIGH SCHOOL

## EXCEPTIONAL TEACHING AND LEARNING

Our middle and junior high school students benefit from learning in safe and supportive school environments with teachers who are committed to supporting each child to achieve his or her greatest potential. At Tulsa Public Schools, our middle and junior high school students can:

- Participate in highly-rigorous **Pre-Advanced Placement** courses to prepare for secondary Advanced Placement;
- **Earn high school credits** in courses such as algebra, physical science, or fundamentals of technology, and
- Build strong **social emotional skills** that help them make responsible decisions, understand and manage emotions, and set and achieve goals.

Learn about our middle and junior high schools and request a copy of our 2019-2020 School Guide.

## PERSONAL AND SOCIAL GROWTH

In our advisory programs, students have opportunities to form strong relationships with their teachers, connect with their peers, and work on developing habits of success that will serve them well in secondary school, college, careers, and beyond.

## TECHNOLOGY-INTEGRATED CLASSROOMS

At Tulsa Public Schools, student use Chromebooks, iPads, SmartBoards and other instructional technology to stay engaged in learning while developing the skills that they will need to succeed in the 21st century global workforce. Depending on his or her school, students can use their devices to participate in self-paced, self-directed learning supported by teachers who serve as learning facilitators and guides.
