

Returning for a second year...

Eagle Hill-Singapore

in collaboration with

SINGAPORE AMERICAN SCHOOL

2019 SUMMER ACADEMIC PROGRAM

FOR AGES 6-14

Give your child
an academic
boost with a
skills-based
summer program

OVERVIEW & MISSION

For more than 40 years, Eagle Hill has been a leader in the field of special education, specifically targeting children with learning differences. Our unique and highly successful model helps children with strategies that can be used throughout their educational journey. As a result of the Eagle Hill experience, children develop the academic tools, self-confidence, and self-advocacy skills required to become successful students.

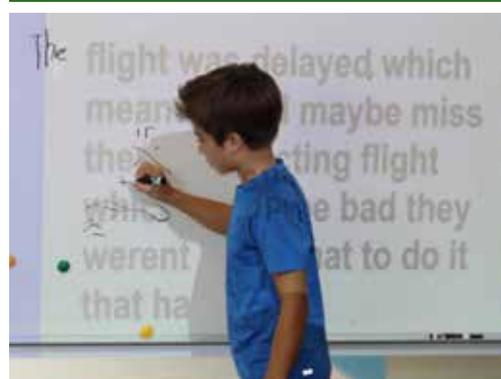

"My daughter was reluctant to go to camp that involved more "studying"; but I think she took away more confidence and learning strategies than she thought she would and she also really enjoyed her time with all the teachers."

—Summer 2018 Parent

OUR APPROACH TO LEARNING

- ☀ Academic classes will focus on the development of specific skills and strategies using an explicit, research-based instructional model.
- ☀ Students are placed in small groups and provided with instruction that is personalized and tailored to each student's learning profile.
- ☀ Students are presented with lessons that use a variety of multi-sensory techniques to ensure that instruction is motivating, fun, and encourages active learning.
- ☀ Children are in a learning environment that is highly structured, supportive, and encourages confidence in both their academic skills and their self-esteem.
- ☀ Our supportive and nurturing environment is key to providing a social experience in which each child feels accepted and valued.

"Just an unbelievably unique school and set of faculty."

CLASSES

Eagle Hill School is excited to offer a three-week Summer Academic Program in collaboration with the Singapore American School. Students will work with an Eagle Hill trained teacher to receive an individualized, skill-based program. Class sizes will be small, and courses will focus on the individual areas of academic need for each student.

This program will include four classes per day for 3 weeks:

- Decoding and Reading Comprehension
- Writing
- Math
- Study Strategies

Classes will include a combination of direct instruction, cooperative group work, and individualized one-on-one instruction. Teachers will provide parents with a detailed report of their child's progress in each subject area, and a parent conference will be offered at the conclusion of the program.

ADMISSIONS PROCESS

A pre-program assessment of skills allows the admissions team to place each student in classes that will best ensure optimal learning. Additionally, admissions team members will have a discussion with parents and ask to see supporting documents and school work.

Details

DATES	June 17 - July 5, 2019
