

Grade 11 US History L2 - Research Unit

Unit Focus

This unit provides students with the opportunity to embark on an in-depth, independent study of a topic of personal interest. Throughout this unit, using a "workshop-style" model, students will work with their peers and the instructor as they build a culminating argumentative research paper. Activities will be dedicated to an application of skills as well as reflection on the research and writing processes. Students will begin with the vital task of proper topic selection, followed by careful development of a workable research question and then the construction of a strong thesis statement. Students will narrow, broaden, or shift the focus of their papers as they research using both primary and secondary sources. Students will actively search for, evaluate, and read a variety of sources, take organized notes on evidence that supports their thesis statements, while properly citing all sources. After they organize their evidence using an outline structure, they will begin writing a formal research paper that clearly supports their thesis statement and demonstrates their understanding of the topic. Their papers will not be mere reports on historical facts, but rather argumentative papers that add to the scholarship on their topics. Throughout the process, teachers will conference with students and help guide them through this independent project.
