HIV Policy

Preamble

The evidence is clear that the risk of transmitting Human Immunodeficiency Virus (HIV) is extremely low in school settings when proper guidelines are followed. The presence of a person living with HIV infection or diagnosed with acquired immunodeficiency syndrome (AIDS) poses no significant risk to others in school, daycare, or school athletic settings. HIV is not transmitted through casual contact and, therefore, is not reason in itself to treat individuals having or perceived as having HIV differently from other members of the school community. HIV is a bloodborne pathogen and is treated as such in the same manner as any other bloodborne pathogen.

The Barre Supervisory Union shall strive to protect the safety and health of children and youth in its care, and its employees, recognizing:

- the rights of students and employees with HIV;
- the importance of maintaining confidentiality regarding the medical condition of any individual;
- the importance of an educational environment free of significant risks to health; and
- the necessity for HIV education and training for the school community and the community-at-large.

Rights of Faculty/Staff

I. Equal Employment

The Barre Supervisory Union does not discriminate on the basis of an employee's HIV infection or association with another person with HIV infection. No applicant shall be denied employment and no employee shall be prevented from continued employment on the basis of having or being perceived as having HIV.¹ In accordance with the Americans with Disabilities Act of 1990, an employee with HIV infection is welcome to continue working as long as he or she is able to perform the essential functions of the position, with reasonable accommodations if necessary.²

- B. The special education coordinator, Section 504 coordinator or other designated school authorities will follow established policies and procedures for students with chronic health problems or students with disabilities to determine on a case-by-case basis the educational placement of a student known to be infected with HIV.⁵ Respecting students' and families' privacy rights school authorities may consult with the student's parent or guardian, seek waiver from parent/guardian to consult with the student's physician, and reassess the placement if there is a change in the student's need for accommodations or services.
