SPECIALIZED EDUCATION FOR SPECIAL CHILDREN

Orange Pre-K is committed to providing learning experiences for each child, ages 3-5, in preparation for early success and school readiness. Orange Pre-K offers a warm and welcoming introduction to the Orange Unified School District and the public school system for students with and without disabilities. We provide a strong, educated and well-trained team that implements a comprehensive program of research-based instructional methodologies for teaching pre-academic and academics as well as social/emotional, adaptive daily living, and vocational skills to continue the development of each child. These strategies collectively prepare our students for their future educational experiences and support achievement of their personal goals set before them.

SPECIALIZED INSTRUCTION

Orange Pre-K offers a Peer Model Program for children from our community ages 3-5. Peer Models are an integral part of the school community. The Peer Model Program is designed to create inclusive learning opportunities for all students. Students enrolled in the Peer Program serve as social, language and behavioral models for students with disabilities in blended classrooms that are taught by California Credentialed Teachers.

For more information about OUSD's preschool and pre-K programs, visit www.orangeusd.org/our-schools/preschool or call 714-997-6202.
