

# SAN FRANCISCO WALDORF GRADE SCHOOL

THE COMMUNITY ENRICHMENT PROGRAM PRESENTS:

## Rudolf Steiner's Life and Work

An Illustrated Presentation by Brian Gray

Tuesday  
**Feb. 26**  
7pm

*Grade School*

Rudolf Steiner (1861-1925) discovered profound insights into the nature of the human being that inspired the founding of Waldorf education in 1919, one hundred years ago. His genius and loving warmth shines through his work as a scientist, philosopher, and artist - one who was able to apply his brilliant insights to practical daily life. Rudolf Steiner's original contributions renewed the practice of medicine, agriculture, curative education and all the arts, as well as deepened our understanding of spiritual realities.

In this illustrated presentation, we will survey Rudolf Steiner's life and work. Please join us in an exploration of this remarkably creative individual.

### **BRIAN GRAY**

Brian Gray trained as an architect and has taught at Rudolf Steiner College in Fair Oaks, California since 1981. He has taught classes to aspiring teachers in Waldorf schools around the world on such topics as the creation of the world and cosmic warmth from a spiritual perspective, sacred architecture, and the constitution of the human being.
