

Safety Committee Minutes

01/11/2019

Mike Fetting (Loss Prevention Specialist) for SFM presented “Work Comp 101 and Safety Leadership” to the Administrative Staff.

The training included basic information on work comp law, premium, experience mod, return to work, and control of injury causes. Mike felt that the premium and cost of lost time claims were eye opening for many in the audience. Mike wrapped up with a request to focus on a few key factors – applying safety leadership standards to slip/trip hazards and reaching high items. They are both easily visible hazards for those that are looking for them.
