APA Formatting

Setting up and formatting the References page

- The References page contains all the sources actually cited in the paper. It should not contain all the sources consulted. If you did not cite the work, do not list it here.
- Font: Times New Roman; size 12
- Place the Reference List at the end of your paper on a new page, continuing the page number from your paper. Page numbering for your paper is located in the upper right hand corner and included in the Running Head.
- Title the page References. Center the title on the line.
- Arrange your list in alphabetical order according to the first author's last name; organizations responsible for the work are placed in the alphabetical list using the first important word in the name (skip initial "A", "An", or "The" in the name).
- Begin each entry at the left margin of the page. If the citation runs to more than 1 line, indent the second and subsequent lines of the entry (a hanging indent).
- Double-space the entire list, both between and within the entries. Use as many pages as necessary.

Sample of a Reference page at the end of your paper: APA format
