

Calibration Summary Report

Campus: _____

Date: _____

Content Area: _____

Content: Using the total number of questions reviewed for ALL 3 work samples (maximum 45 questions), count the total marked yes and the total marked no and record on the chart and calculate percentages.

Cognitive: Record the total the number of work samples (maximum of 3) that are cognitively aligned.

Context: Using the total number of questions reviewed for ALL 3 work samples (maximum 45 questions), count the total marked yes and the total marked no and record on the chart and calculate percentages and then record the total number of work samples that are 90% or higher TEKS aligned.
