

STEM Summer Apprenticeship Program for High School Students

- Are you interested in a STEM research experience?
- Are you interested in learning artificial intelligence tools?
- Are you interested in research with national defense applications?

Our Summer Research Program offers

- Hands-on research experience on the most promising data analysis techniques-Machine Learning, Statistics, and Topological Data Analysis.
- Professional development opportunities including presentation of scientific research and writing research manuscripts.
- Participation in a dynamic research group.
- A stipend of \$3,000.

Requirements

Students must meet **ALL** of these eligibility criteria:

- Have at least a 3.2 GPA.
- Must be a rising 11th or 12th grade student.
- Must be able to commute to the UTK campus on a daily basis.
- Have strong interest in STEM.
- Provide two letters of recommendations.
