Take the check out of the box!

Next, a welcome screen is displayed. Read the welcome screen and then click on *I Accept*.

Google accounts

Change Language: English

### Welcome to your new account

Welcome to your new account @nhcs.net. Your account is compatible with nearly all Google products, but your nhcs.net administrator may decide which products are enabled for your account. For tips about using your new account, visit our [Help Center](#).

Google has made its services available to organizations using Google Apps. In addition to the [core suite](#) of messaging and collaboration applications, you may access many [Google services](#) ("Additional Services") using your test.admin@nhcs.net account. Your nhcs.net administrator determines which Additional Services you may access using your account. For tips about using your new account, visit the Google [Help Center](#).

Please be aware that when you use Google services, your domain administrator will have access to your test.admin@nhcs.net account information, including your email. You can learn more [here](#), or by consulting your domain administrator's privacy policy, if one exists. You can choose to maintain a separate account for your personal use of any Google services, including email. If you have multiple Google accounts, the username that appears at the upper right corner of most Google services will help you ensure that you're using the intended account.

The Additional Services are provided by Google to you under these [terms of service](#) and [privacy policy](#). Certain Additional Services may also have [service-specific terms](#). If your domain administrator enables any of the Additional Services, Google will treat your use of any of the Additional Services as acceptance of the applicable service-specific terms.

Click "Accept" below to indicate that you understand the changes to your account and agree to the [Google Terms of Service](#) and the [Google Privacy Policy](#) for your use of Additional Services.

If you are asked to reset your password, type in the original password and then your new password. Your new password should be your NCWise number. Click *Submit*.

Close any pop-up boxes on this page – example: Useful tips.

Your iGoogle page contains a “gadget” that can be used to access your email, or you can go directly to *mail.google.com*. If using the gadget, click on the word *Gmail* to open your mailbox.

## Sample mail window:

The screenshot shows a Gmail interface with several annotations:

- Left sidebar:** A list of folders including **Inbox**, Starred, Important, Sent Mail, Drafts, Follow up, Misc, Priority, and More. A bracket groups these folders with the text: "Email folders – You will be able to save messages into the different folders. Click on the different folders to view stored messages."
- Message list:** Two messages are visible. The first is from "Discovery News" about the Mars Lander Beagle 2. The second is from "Gmail Team" with the subject "Get started with Gmail". A box points to the messages with the text: "Messages appear here. To read the message, simply click on it."
- Storage:** A status bar at the bottom left shows "0% full Using 0 MB of your 25600 MB". A blue arrow points to this text with a box containing: "How much space do I have left? Look here."
- Footer:** Copyright information for 2012 Google and account activity details are visible at the bottom.

When you have selected an email message, more menu choices appear.

The screenshot shows a Gmail message view with annotations for the 'More' menu:

- Message:** The message is from "ESPN.com" with the subject "Gundy wins Bryant Award as top college coach".
- Message Actions:** Above the message are icons for Reply, Report spam, Move to folder, and Archive. Arrows point from boxes explaining these actions to their respective icons: "Takes you back to the inbox" (Reply), "Report spam" (Report spam), "Allows you to move the message to a folder for storage" (Move to folder), and "Allows you to label the message for later reference" (Archive).
- 'More' Menu:** A 'More' dropdown menu is open, showing options: "Mark as unread", "Mark as important", "Add to Tasks", "Add star", "Create event", "Filter messages like these", and "Mute".

## Composing a new email message

Click on *Compose*. The screen below will appear.

The screen above is pretty self-explanatory – address the email, add a subject line and type the text of your message. You are also able to attach files.

Hover your mouse over the different icons to see what they will do – the icons function much like a typical word processor.

When finished, click *Send*.

When finished, either sign out or close the browser.

Additional Gmail help can be found here: <http://support.google.com/mail/?hl=en>

In addition to Gmail, you also have access to many of Google's tools – documents, spreadsheets, presentations, calendar, sites, video and more. Click on the different links below. Each opens in a separate tab. Note: Not every item on the *More* page is available through NHCS.
