

Citizenship Codes

Parents often ask what the criteria are for determining citizenship grades. Although, as in any grading system, the teachers have the right to determine and develop their own criteria, the following is a “general” guide for staff to follow if they are looking for some descriptors:

1. Excellent Student displays self-discipline and contributes positively to the class. He/she displays qualities beyond that which is expected of the particular grade level.
2. Very Good Student displays self-discipline and responsibility on a daily basis.
3. Satisfactory Student displays conduct, attitude and behavior expected of the particular grade level. He/she responds to an occasional reminder of behavioral expectations.
4. Poor Student is disruptive to the learning process: frequently needs to be reminded of classroom expectations.
5. Unacceptable Student is often disruptive to the learning process. Does not respond to measures for correcting conduct, attitude and/or behavior.
