

Staten Island Academy Adventures Brochure Spring 2019

Program Coordinator: Jessica Lee
jlee@statenilandacademy.org

Let's Cheer for SIA!

Ms. Susan

(Grades Pre-K 3 - Grade 4)

Join the Staten Island Academy Tigers for a cheerleading class during the Spring Adventures program! During this eight-week session, students will have the opportunity to learn basic cheer motions, jumps and a cheer/dance routine that will be incorporated into an end-of-term performance. Cheerleading will help build confidence and team playing skills all while having fun! Our instructor, Susan Fiorentino, cheered from elementary school through college and has previously coached a high school team and currently coaches cheerleading and gymnastics at the YMCA. Pricing for this class includes an additional \$40-\$50 fee for a practice shirt and pom-poms. Gooooooooooooo Tigers!

Chess Wizards

Premiere Chess

(Kindergarten - Grade 5)

Ready to amaze all with your brain power? More than just a game of winning and losing, we challenge students to think ahead, visualize their goals, treat others with respect and learn from their mistakes. Chess enhances cognitive development, improves scholastic performance and boosts confidence...and is a game kids can enjoy for a lifetime!

Soccer Premier

Soccershots

(Grades 1 and 2)

Focusing on individual skill, fitness and sportsmanship, each session provides an opportunity for kids to be challenged through fun games and team competitions.

*****Please see attached instructions on how to register online*****

Soccer Classic

Soccershots

(Pre-K 3 - Kindergarten)

Using creative and imaginative games, we focus on basic soccer skills like passing and shooting. At the same time, we highlight a positive character trait during each session, such as respect, teamwork and appreciation.

*****Please see attached instructions on how to register online*****

Brain Bees

Ms. Lee

(Grades 1 and 2)

Our students are busy bees! Homework help sessions will last one hour and include independent, one-on-one and group work. Students will learn fun and new ways to complete their assignments, while brushing up on their skills and having fun. Let's get to work!

Ancient Greece

Mrs. Powell

(Kindergarten - Grade 2)

Travel back in time to learn what life was like long ago in Ancient Greece! Learn about who's who on Mount Olympus as we connect the gods and goddesses with some of our favorite myths.

Imaginary Pet Sketch Writing

Mrs. Powell

(Grades 3 and 4)

After gaining an understanding of the critical elements of descriptive writing, students will select an unusual imaginary pet. They will conduct mini-research on the animal they chose. Then, students will combine factual information about the animal they selected and fictional details about their life with the pet to create an "Imaginary Pet Sketch."

Imagination Story Time

Ms. Johnson

(Kindergarten - Grade 2)

Come read a story and then create your favorite character! From a fuzzy teddy bear to a creepy crawler...the choice is yours! You will be able to take your creation home with you each week. Reading and art are combined in this fun and creative course!

Oriental Dancing

Ms. Metwally

(Grades 2 - 4)

Join us and learn the Middle Eastern expressive dance showcasing movements of the torso and fluid movements of the arms that is aimed to build strength and coordination. We will explore the history of dancing in the Middle East, explore the culture and learn a belly-dance routine that is sure to be an enjoyable and engaging experience for all!

Building Challenges

Mr. Wollney

(Grades 3 and 4)

From paper bridges to spaghetti towers, participants will have the opportunity to design and construct various types of structures using unusual materials to overcome challenges of load-bearing, height or distance.

Design a Zoo

Mr. Wollney

(Grades 1 and 2)

Modern zoos are much more responsive to the needs of animals and their well-being than in the past. In this program, the students learn about the dietary, habitat and spatial needs of particular types of animals so that they can design an appropriate place for them to live and be observed, without interrupting their otherwise normal lives.

Scientific Art

Mr. Wollney

(Pre-K 4 - Kindergarten)

Participants will conduct science experiments and adventures in technology that culminate with results that are colorful and artistic in nature. Activities include topics such as paper chromatography, topology and immiscible substances.

Revolution Math

Revolutionary Math

(Grades 2 - 5)

SIA's after-school program has partnered with Revolution Math to bring our kiddos an innovative program designed to help develop their math skills and an overall love of learning. This live, online program integrates an interactive learning experience with a story-based curriculum, making the learning process super fun, engaging and results-driven. An engaging teacher will guide the kids (learning squad) during each class, helping them gain a procedural fluency and conceptual understanding of critical math concepts. Parents can also track their child's progress online and through weekly updates from their highly trained teachers.

We hope to see your child/children enjoying all that Staten Island Academy's Spring Adventures session has to offer! We look forward to creating, learning and most of all having fun!

ADVENTURES COURSE SCHEDULE
Registration: Spring 2019

Billing will be charged through SMART Tuition. Please note that we reserve the right to cancel courses that are under-enrolled.

Extended Day: Supervised Extended Day service is available to all Pre-K - Grade 8 students. Students taking Adventures courses should report to Extended Day; they will be picked up there and escorted to courses. Students will return to Extended Day following their course for parent/guardian pickup.

Pickup Locations: Pre-K 3 - K in Early Childhood Building and Grades 1 - 5 in Patrick Commons

***Indicates online registration*

**Indicates fee included for materials*
