Obadiah Dunham

Assistant Superintendent, North Region

Students interested in taking an accelerated 6th grade math course in the summer of 2019 must notify the school counselor of the middle school the student will be attending in the fall of 2019 of their intent so that schools can plan accordingly for potential changes in a student's academic schedule. Please complete and return this form no later than May 24, 2019 to the middle school office that the student will be attending in the fall of 2019.

Process and Required Documentation for Summer Accelerated Math

Students and Parents:

Prior to sign up and acceptance into a summer accelerated math class, you must complete the attached "Notice of Intent to Participate in Math Acceleration Class" document and return it to your middle school no later than **May 24, 2019**.

After completion of accelerated math class:

By August 16, 2019, you must submit documents verifying the completion of work and grade received with appropriate signatures to your counselor in order to receive final approval from the school principal.

- School principals are the sole determiners of the approval of courses to determine student placement
- Families are responsible for the completion of documentation and submission of the required documentation.

Be advised that:

- Completion of a non-NSD recommended summer accelerated math class does not automatically ensure advancement to the next level of course work in NSD. Principal evaluations of coursework are required before advanced placement will occur. **Students who earn only partial credit for an accelerated 6th grade summer math course will not advance to the next level of course work in NSD and must enroll in a full year of 6th grade math in 2019-2020.**
- Enrollment in 7th Grade Challenge Math Course is a year-long commitment for the 2019-2020 school year.

Notice of Intent to Participate in Math Acceleration Class

Options for Math Acceleration

Option 1: Take the Accelerated 6th Grade Math Summer Course offered by the NSD

Considerations: This course will use the district-adopted 6th grade math curriculum taught by a qualified teacher. This course moves at a fast pace covering a year-long course compressed into 5 weeks and involves many hours of additional homework. Students who earn only partial credit for an accelerated 6th grade summer math course will not advance to the next level of course work in NSD and must enroll in a full year of 6th grade math in 2019-2020.

Website: [NSD Summer Accelerated Math Courses](#)

Course: Accelerated 6th Grade Math

Option 2: Take an OSPI approved online 6th Grade Math course

Course options can be found at <http://www.k12.wa.us/ALD/Providers/ApprovedProviders.aspx>.

Considerations: Proof of completion of the online math course must be submitted to the school counselor **August 16, 2019**, or the student will be placed in 6th grade math for the 2019-20 school year.

Decision

After considering all of the information provided, and reviewing the materials available on the website, I have made the decision to go with the following option:

- I will take the Accelerated 6th Grade Math Summer Course offered by the NSD. I will complete the NSD Summer School Registration documents located at [NSD Summer School website](#).
- I will take an OSPI approved online 6th grade math course. 6th grade math course options can be found at <http://www.k12.wa.us/ALD/Providers/ApprovedProviders.aspx>

I will return this completed form, the "Notice of Intent to Participate in Math Acceleration Class," to the middle school that I will be attending in the fall of 2019 no later than May 24, 2019.
