

# Lake Washington School District Health Services

PROGRAM REPORT: MARCH 25, 2019

# LWSD School Nurses

---

# School Nurses

---

Lake Washington School District nurses practice professional nursing and provide school health services designed to:

- Promote health and safety
- Intervene with actual and potential problems
- Provide education and case management services
- Actively collaborate with students, families, communities, school staff and district employees
- Train and monitor Health Room Secretaries

# Health Room Secretaries

---

- Supervision and monitoring of students referred for illness
- Administration of first aid and medication to students under the direction of a health professional
- Check in and monitor medication compliance
- Vision and hearing screenings
- Immunization compliance
- Camp and field trip preparations

# Health Services: Areas of Support

AEDs

Blood Born Pathogens and Communicable Diseases

Vision and Hearing Screenings

Head Lice

Catheterization, Feeding Tubes, and Oxygen

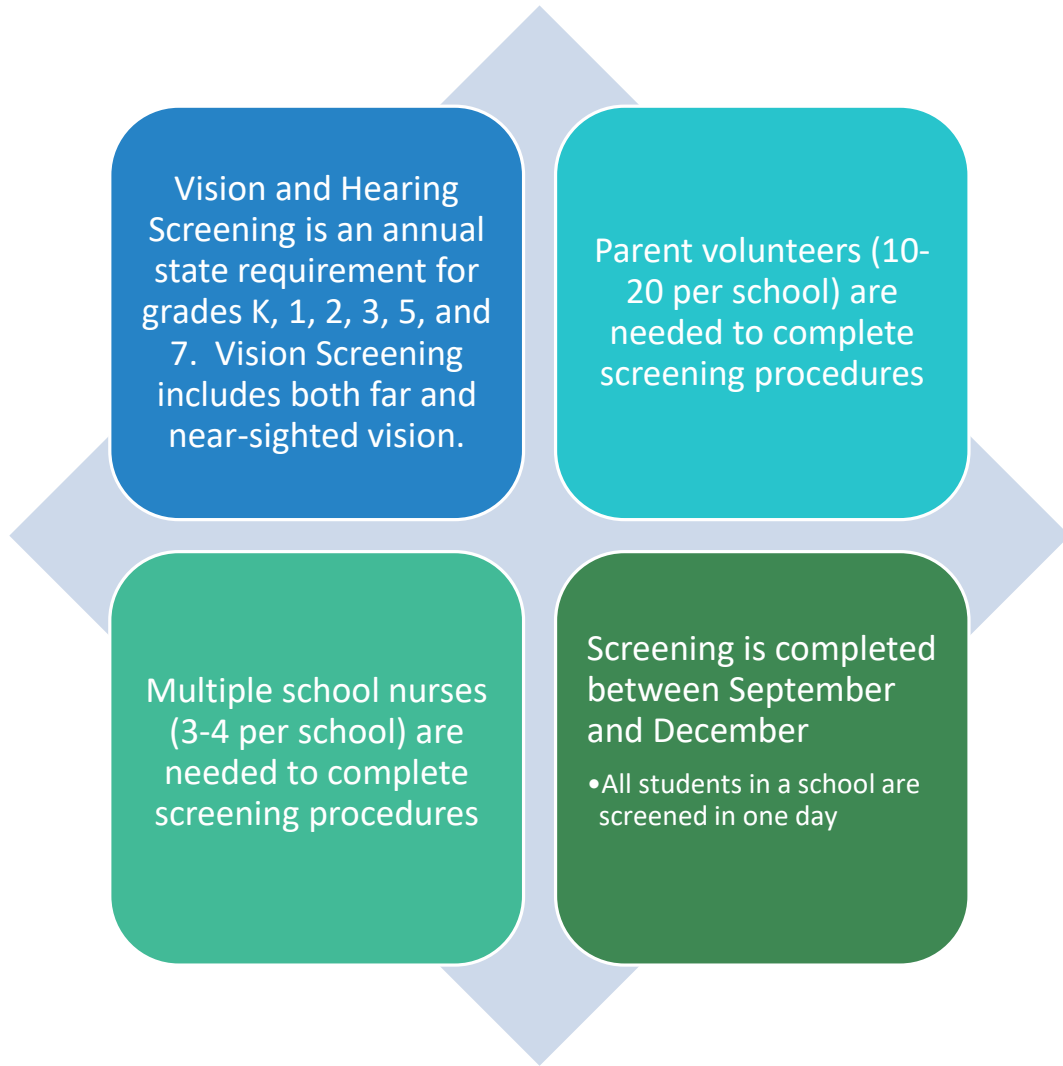

Immunizations

Medications

Nutrition

Staff Training

Community Resources

# Vision and Hearing Screening

Allergies and  
Anaphylaxis

Diabetes

Seizures

Cardiac

Asthma

Life  
Threatening  
Conditions

# Individual Health Plan

An IHP is a plan that considers how to deal with what might happen with a student medically while the student is in school.

It is designed to address medical issues and is a formal agreement that outlines the student's needs and a plan for addressing those needs.

Parents or caregivers, the student, the student's health care provider, and a multidisciplinary team of school staff work together to develop the IHP. An IHP serves both the student and the school.

# Immunizations

## Required Immunizations

- Hepatitis B
- Diphtheria, Tetanus and Pertussis
- Polio
- Measles, Mumps and Rubella
- Varicella

## Exemptions

## School Exclusion

# Measles Outbreak
