

Water

Water is important to all
To people short and tall
65% water you are.

Yet in some rural parts
They travel miles with hand carts
In the hope to find just a quart.

On women and girls the task befalls
To fetch water they can't rebel
Even as impurities makes them unwell.

Benevolent people kind and good
Dug wells for they understood
The part of clean water in livelihood.

Water is important to all
Do your part to conserve it, y'all
65% water you are.
