

BERKSHIRE SCHOOL

Calculator Requirements for Math Classes at Berkshire

All students are required to have the [Ti-Nspire CX CAS version](#). This calculator has many features that enhance student learning and, over the past four years, we have been integrating the Nspire into our curriculum. In addition to the calculator, students will benefit from access to the associated software that comes with each Nspire calculator. These calculators are available at the Bookstore and can be purchased during Registration. You may also purchase one in advance. No matter how you acquire the calculator, we ask that you please retain the student software license number that comes in the package as this is the only way to access the free software without having to purchase a separate license.

Finally, though the Nspire CX CAS may be used on SAT and AP exams, it is not considered an acceptable calculator on the ACT. Here is a link to the [SAT acceptable calculator policy](#) and here is a link to the [ACT version](#).

For questions, please contact Mathematics Department Chair Trudy Pzynski at 413-229-1322 or tpzynski@berkshireschool.org.
