

Senior Spotlight: Caitlin S.

I was born and raised here in the Cayman Islands for the past 18 years. I started at CIS in Grade 5, and my senior year makes it seven years since I've started. In describing myself, I am someone who is very outgoing, confident, and charismatic. Something that many people are surprised to know about me is that I actually love entertainment and bringing smiles to people's faces through laughter. I am a collector of money from all over the world from both my personal and family travels, local and international stamps, and unique rocks. My favorite hobby is traveling. My favorite place is Dublin, Ireland. Outside of school, I enjoy volunteering within my community through my own personal endeavors. My most rewarding community service experience would be in my personal visits to the Pines Retirement Home reading bible passages and learning about the history of my beautiful island. I find it important to also spend time with my family and close friends. Confidence is a quality I most admire, but sadly we live in a time and generation that can be so negative and judgemental. I find it important to associate myself with like-minded people and find the positives among the negatives. My current plan is to further my education at university either in Canada or the US where I plan on studying either business management, finance, or marketing. I also hope in the near future to travel more, and experience different cultures, building more memories with friends and family.
