

## Senior Spotlight: Conor C.

I am a born and raised Caymanian and have lived here all my life. Previous to CIS, I attended Triple C School until 6th grade when I moved to Cayman International School. This transition was hard at first but as I got to know my peers it became increasingly easier. I have now been at CIS for 5 years and have enjoyed getting to meet people of many different cultures and backgrounds. I am a very competitive person when it comes to sports and love to make people laugh. I find that negativity can not only affect you but it can also have an impact on everyone you encounter, which is why I feel it is important to have a laugh every once and awhile. One thing people might not know about me is that I devote almost every Saturday morning to coaching the youth teams of Academy Sports Club and helping them develop their football skills.

My favorite family tradition has always been Christmas as every year we string up lights and create displays in Spotts for everyone to see. There we also give out presents to kids which is without a doubt my favorite part, as they always leave smiling and happy. I am heavily involved in sports outside of school where I play football almost every day of the week. I see this as a time to relax after a long day at school. If I could have any superpower in the world, I would choose to be able to fly so that I could travel anywhere at any time and experience the world from a bird's eye view. My favorite and the most important place on earth to me is Grand Cayman. To some Cayman may seem to be a random little island, however to me it is where I grew up and call home. "I have noticed that even those who assert that everything is predestined and that we can change nothing about it still look both ways before they cross the street" - Stephen Hawking. This quote is my favorite because I believe that nothing is ever set in stone and that every single person is capable of changing the outcome of a situation, even something as simple as a grade; everything is possible.
