Goals for Tech Committee moving forward

- Selecting technology to integrate into the classroom that supports curriculum and standards.
- Keeping technology current and updated through vetting and planning for hardware and software.
- Providing resources to instruct staff and students on digital responsibility.
- Training staff and students on our district's technology resources.
- Support new and innovative tools and resources that can help staff and students enhance the quality of work, spark curiosity, produce critical thinking, and create deeper engagement in content.

Vote 11 Green- 0 Yellow- 0 Red (2 members absent when vote took place and 1 guest that does not vote)

Breaking Down Bright bytes in three categories we selected based on goals

Digital Citizenship Students-

- Every teacher assumes others teach it
- Where can we embed it into certain classes and curriculum
- Not leave it to media centers, everyone is involved
- Conversations are coming up on advice from adults
- Learning together staff and students

Digital Citizenship Teachers-

- Teachers have less action on digital citizenship teachers than their knowledge of digital citizenship
- The tech team needs to communicate and provide training and support in order for teachers to implement
- Most categories on time spent were at 50% or higher in none. Looking at the data we should be able to provide clarity through communication of where and when we teach components of digital citizenship.

Professional Learning-

- Highest interest Multimedia and Online Tools for Critical Thinking
- 23% said NO tech PD
- See what teachers are using and on the ground and create PD to build on it.
- Many staff don't know what they are missing for PD
- No PD until devices are available
- Comparing students and teachers data teachers were higher rating in many categories
