Description

In preparation for the upcoming school year and rigorous pace of the AP Chemistry course, it is expected that you will complete the summer assignment before returning to school in August. The assignment is based on an online tutorial called FlinnPrep.

You will receive an invitation to join this classroom, and the cost is \$22.95 (about the same as if you purchased a review book). I will assign 8-10 units, and you should complete the first unit by June 15, so that I can be sure that you are able to access the tutorials.

Each unit should take about one hour to complete, and I will track your progress through Flinn Prep. If you are unable to complete the summer work, we will re-evaluate your ability to enroll in AP Chemistry upon your return to school in August.
