

Summer Math Fun G3

Pick a square, do the activity, have a parent initial the square!
Bring in your signed paper in the fall for recognition!

Pick a board game and play. What math do you do while you play the game?	Make up your own math activity today and share it right here!	Record some number pairs that will together make 100!
With chalk, make a repeating pattern on a sidewalk or driveway near you!	Take out measuring cups and line them up! Which holds the most? Which holds the least?	Go on a shapes hunt for triangles and quadrilaterals. How are they similar? How are they different?
Start with 8 and count by 10's (8, 18, 28, ...). Try starting with a different number! Write your numbers in the sand or with paint. Talk to someone about the patterns you see.	Label each cup of an egg carton with the numbers 0-11. Put two coins in the carton, close the lid and shake it up. Open it up and add or subtract the two numbers that the coins landed in. Which is the sum? Which is the difference?	Coin swap! Gather coins from your piggy bank and from willing family members to sort and count. Try some trades! What can you "trade" a quarter for? How about a dime?
Think of things that come in 2's like a pair of socks! Skip count by 2's until you get to 40! Then try skip counting backwards from 40!	Pick up a potato. Try to find items that are lighter than the potato. Then try to find things that are heavier than your potato. Take a picture of your items.	Going to see a movie? How many people are going? Round to the nearest dollar and calculate the total cost for you and your friends and family going!

Rainy day? Need a break from the sunshine? Hop onto Dreambox! See the directions below for how to log on to the Claude Chester specific Dreambox. Keep tally marks here for each day you go on Dreambox!
