

Summer Math Fun G5

Pick a square, do the activity, have a parent initial the square!

Bring in your signed paper in the fall for recognition!

|--|---|--|
| <p>A snail can sleep for 3 years without eating. How many months is that?</p> | <p>How many nickels would you get if you gave the bank 135 pennies? How many dimes would you have to give the bank in order to get \$5.00?</p> | <p>Make up your own math activity today and share it right here!</p> |
| <p>Catching up on summer reading? How many pages are in your book? If you read 8 pages a day, how many days will it take you to finish it?</p> | <p>Measuring liquid is fun! Gather measuring cups and some containers. How many 1 cup full fits in a container, how many $\frac{1}{2}$ cups? How many $\frac{1}{4}$ cups? Experiment with different containers and see if you can find a pattern!</p> | <p>Fill a small container with beans, Cheerios, or any small objects. Estimate how many are inside. Then count to see how close you were! Try again with another container. Were you closer the second time?</p> |
| <p>What fraction of people that live in your house are adults? What fraction are children?</p> | <p>Think of things that come in fours, like 4 legs of a chair. Recite the multiples of 4 until you reach 56! Try counting backwards by four!</p> | <p>Record some number pairs that will together make 200!</p> |
| <p>It is 2019. In what year will you be double your current age?</p> | <p>What is your favorite movie? How long is it? If you start watching it at 2:30 what time will it end?</p> | <p>Count out 50 objects. Put them in equal groups. How many different ways can you divide them into equal groups?</p> |

Rainy day? Need a break from the sunshine? Hop onto Dreambox! See the directions below for how to log on to the Claude Chester specific Dreambox. Keep tally marks here for each day you go on Dreambox!
