

**PHILOSOPHY**

The purpose of our schools' programs is to provide educational opportunities for the maximum growth of every student of the district. The educational program must assure the cultivation of the student's intellectual, moral, and artistic capacity. Our schools must present a program of sufficient breadth and scope to deal with a variety of abilities, capacities, and patterns of growth. The program should be developed by professional personnel working with citizens of the community.

The ultimate aim is to produce self-disciplined individuals who are capable of making intelligent decisions in all aspects of our modern social environment. Graduates will be prepared to be productive and responsible members of society in the 21st Century.
