

## **AP Microeconomics summer 2019**

Students in AP Microeconomics are expected to read “Freakonomics” by Dubner and Levitt. After completing the book, they should write a two-page, double-spaced response paper. Students are encouraged to reflect on how the book influenced their impression of economics, as well as reflect upon any studies from the book that interest them. They should also discuss why economics is a useful subject to study. A printout of the paper is due on the first day of class and will count towards the first trimester grade.
