

Geometry Summer 2019

Students in Geometry are expected to complete 50% of the “Algebra 1 Mission” through Khan Academy. They may choose whichever topics within the mission that interest them the most. Students will benefit from consistent and continual work on this task throughout the summer. This assignment is due on the first day of class, and will count towards the first trimester grade. Students should use their Salisbury School email address for their username. The mission can be found here:
