

AP Computer Science A Summer Assignment

AP Computer Science A is a challenging and demanding course that requires students to think creatively. To maximize our class time, students enrolled in APCS A must complete the following tasks prior to the beginning of the school year.

1. Join the AP Computer Science - A Online Course
The required textbook is available for free online. In order to access the interactive text, students will need to register at <https://runestone.academy/runestone/default/courses>. Unfortunately, the Microsoft Account option is for a personal Microsoft account and not your Bolles account. Be sure to enter APCS-A_2019-20 as the Course Name when you are registering.
2. Students should have a device that meets the school's BYOD requirements.
3. Complete the first three parts within Java Basics of the APCS-A_2019-20 course.
 - What is Java?
 - What is a Class and an Object?
 - First Example Classes
