

Third Grade Unit 2- Number Stories and Arrays

In this unit students will:

- Add within 1,000 fluently.
- Subtract within 1,000 fluently.
- Assess the reasonableness of answers to problems.
- Solve 2-step number stories involving two of the four operations.
- Interpret multiplication in terms of equal groups.
- Use multiplication and division to solve number stories.
- Model number stories involving multiplication and division.
- Interpret division in terms of equal shares or equal groups.
- Multiply within 100 fluently.
- Divide within 100 fluently.

Ideas for Home:

- Practice basic facts to add and subtract larger numbers.
- Help your child recognize examples of equal groups, equal sharing, or array situations in everyday life. Examples: 3 boxes of granola bars with 4 bars in each box (3 equal groups of 4) gives you a total of 12 granola bars.

• Example of an array

- Practice multiplication and division facts
- Building Skills through Games
Games are great practice for multiplication and mental addition.
 - Array Bingo
 - Division Arrays
 - Roll to 1,000

Please note: The activities above are not homework. They are suggestions for supporting learning at home. Please consult with your child's teacher for homework and specific suggestions related to your child's needs.
