IPM STATEMENT:

It is the goal of Westside Union School District to implement IPM by focusing on long-term prevention or suppression of pests through accurate pest identification, by frequent monitoring for pest presence, by applying appropriate action levels, and by making the habitat less conducive to pests using sanitation and mechanical and physical controls. Pesticides that are effective will be used in a manner that minimizes risks to people, property, and the environment, and only after other options have been shown ineffective.

Our pest management objectives are:

- To implement a safe and effective program to protect the health and well-being of students and staff, plus maintain a productive learning environment.
- Prevent pests from spreading in the schools and minimize pesticide exposure to students, staff, and the public.

IPM TEAM:

In addition to the IPM coordinator, other individuals who are involved in purchasing, making IPM decisions, applying pesticides, and complying with the Healthy Schools Act requirements, include:

- Lead Grounds Worker – Purchasing, making IPM decisions, applying pesticides and complying with Healthy Schools Act Requirements.
- Grounds 1 Worker – Purchasing, applying pesticides and complying with Health Schools Act Requirements.
- Custodial Supervisor – Purchasing, making IPM decisions, applying pesticides and complying with Healthy Schools Act Requirements
- Custodial 1 & 11 – Maintenance 1 &2: Applying pesticides and complying with Healthy Schools Act Requirements

- **M & O Director – Purchasing, making IPM decisions, applying pesticides and complying with Healthy Schools Act Requirements.**

PEST IDENTIFICATION, MONITORING AND INSPECTION:

Pest Identification is done by Eagleshield Pest Control. Monitoring and inspection for pests and conditions that lead to pest problems are done regularly by the Grounds and Custodial staff and Eagleshield Pest Control and the results are communicated to the IPM Coordinator.

Specific information about monitoring and inspecting for pests, such as locations, times, or techniques include: Visual inspections by custodial and grounds staff and our pest control company. Results are reported to the PM coordinator through the work order system. Inspections include condition of building, sanitation, pest damage and pest sighting.

PESTS AND NON-CHEMICAL MANAGEMENT PRACTICES:

ANTS: Remove food, seal cracks, soap and water.

COCKROACHES: Remove food, fix leaks, seal cracks, manage irrigation, roach traps.

MICE: Remove food, seal cracks, traps.

GOHPERS: Physical removal, traps, manage irrigation

SNAKES: Physical removal, manage irrigation

CHEMICAL PEST MANAGEMENT PRACTICES:

If non-chemical methods are ineffective, the school district will consider pesticides only after careful monitoring indicates that they are needed according to pre-established action levels and will use pesticides that pose the least possible hazard and are effective in a manner that minimizes risks to people, property and the environment.

This school district expects the following pesticides (pesticide products and active ingredients) to be applied during the year. (This list includes pesticides that will be applied by school district staff or licensed pest control businesses)
