

Middle Row Left:

Ethan Sax, '24, and his dad, Ken, perform a science experiment at Labs with Dads. Our 2nd grade classes host these fun science-themed mornings a few times each year. This experiment was creating space-themed Alka-Seltzer rockets as a part of their space unit.

Scarlett Schlacher, Ella Hildreth, and Francesca Kovalik, all '27, build beautiful patterns with oversized pattern blocks on a cold day in the courtyard.

Right:

Felix Anderson, '21, runs the fire drill while he served as Headmaster for the Day. This fun gala auction item is always a hit!
