

**AP Psychology
Summer Vocabulary Assignment**

**Mr. Graham
KHS 2019-2020**

There is a TON of vocabulary to learn in the study of Psychology. Throughout the year you will create flashcards for each of the assigned words for every chapter of study. To obtain full credit for the vocab cards, you will need to do 4 things: 1. Write the term (This will go on the front of the flashcard) 2. Define the term (you should copy the *exact* definition from your text, goes on the back of the card) 3. Explain why the term is significant/important (this is where you will tell me why it is important enough to study, goes on the back of the card) and 4. Make a connection to another term (you should identify another term from the list, and explain how the two are connected/related. *Each card must have your last name on it.* In addition, you should do whatever it takes to make the word more memorable; draw more pictures, link it to a movie or television show, or just simplify it in as few words as possible. This additional piece is not required, but it will only help you retain the knowledge.
