

CONTRACTED REPAIR SERVICES

The Tracy Unified School District Board of Trustees believe that school district assets can be a resource to benefit other local non-profit organizations. Providing contracted out vehicle repair services benefits both Tracy Unified School District and other non-profit agencies. In the past, the Transportation Department has contracted with other non-profit agencies to provide vehicle repair services when providing such a service does not negatively impact the students of Tracy Unified School District. This policy will give guidance to district staff for the continuation of this practice and authorize the Transportation Department to continue contracting out for the repair services to other non-profit agencies and school district vehicles.
