

SUMMER SCHOOL

The Tracy Unified School District believes and supports the concept that there is value in providing extended learning opportunities for students. These opportunities may occur before and after the regular school hours, on weekends, during inter-sessions and or during the summer.

The Tracy Unified School District offers summer school for students unsuccessful on one or more of the proficiency tests and desiring to take regular core curriculum and/or enrichment classes.

Summer school is also offered to any Special Education student who requires an extended year according to their I.E.P.

The organization of summer school is carefully evaluated each year in an attempt to adequately meet the children's needs and up-date the program.
