

TEMPORARY FACILITIES

The Governing Board supports to the maximum extent possible, that school facilities needed for the District’s educational program shall be designed and constructed to have a permanent appearance. This appearance is important as a reflection of the significance and stability of the educational process within the community. Temporary appearing facilities, without foundation and compatible aesthetic improvements, shall only be utilized as an interim measure until more permanent appearing facilities are available.

Portable, manufactured, or pre-fabricated classrooms shall continue to be used to temporarily accommodate enrollment growth in excess of permanent facility availability or pursuant to State building program requirements. Temporary facilities may, however, be retained on school sites beyond the initial interim period where they can be incorporated into the campus with improvements necessary to give a permanent and compatible appearance.
