August, 2019

Dear Parents/Guardians:

The Food Services Department of Parkland School District welcomes you and your child to kindergarten, and look forward to serving your child this school year. Breakfast and lunch are served daily in all buildings. Menus are available each month on the food services department page of our District website, your building page of our District website, or from your building office. Breakfast is \$1.50. Lunch is \$2.70.

The Food Services Department operates all cashier functions through a point of sale software program called eTriton. Each student has an account established in the system, using their student identification number. This number and account will remain with your child throughout their years at Parkland. When your child purchases a meal or snack from us, the amount is automatically deducted from the balance in your child's account. To deposit money into your child's account, our cafeterias accept cash or checks made payable to "PSD Food Services". Deposits should be placed in an envelope clearly labeled with your student's name and teacher's name. Envelopes may be dropped off each morning in the cafeteria.

In addition to accepting cash or checks, the food services department also offers an online payment service to our families. This service, located at www.MySchoolBucks.com, offers parents simple and secure online transactions and features the ability to: (1) monitor account balances, (2) track and review purchase history, (3) create low balance alerts, and (4) for a service fee pay with your credit, debit, or electronic checks.

Since your child is new to eating in the cafeteria, a la carte items will become available to purchase on Tuesday, October 15, 2019. This is done to give students the opportunity to adjust to the process of purchasing lunch in the cafeteria. A list of a la carte items is available on the food services department page of our District website. At any point during the school year, parents may place a restriction on their student's account. Parents wanting to place a restriction on their student's account may do so by notifying the food services office in writing. Once a restriction is placed on an account, it will remain on the account until we are again notified in writing to change it.

Again, welcome to kindergarten at Parkland School District! If you have any questions concerning food services, please feel free to contact us at 610-351-5670.

Sincerely,

Lori A. Seier
