

CompTIA A+

INDUSTRY-BASED CERTIFICATION DESCRIPTION

The Comp TIA A+ certification exams measure various objectives.

CompTIA A+ 220-1001 covers: mobile devices, networking technology, hardware, virtualization and cloud computing and network troubleshooting.

CompTIA A+ 220-1002 covers installing and configuring operating systems, expanded security, software troubleshooting and operational procedures.

The A+ CompTIA certification exam includes performance-based questions. These questions test your ability to solve problems in a simulated environment.

Candidates should have the recommended experience of at least nine to twelve months of hands-on experience.
