

ELEMENTARY SCIENCE SUMMER/FALL 2019

New Science Standards are here!

The state adopted new K-5 Utah Science with Engineering Education (SEEd) Standards in June. To help you prepare for the transition to the new K-5 SEEd Standards, we will be offering face-to-face **Introductions to the New Standards and Pedagogy** and a blended learning **Introduction to 3-Dimensional Learning: Shifts in Science Pedagogy**.

Introduction to 3-Dimensional Learning: Shifts in Science Pedagogy:

This is a **3 USBE credit** blended learning course that is self-paced and differentiated to meet you and your team's needs. The online portion has gathered and organized the resources you will need to understand the shift and the research behind the new standards. It provides models of objectives, lessons, and strategies to support and guide you.

To enroll, contact your school STEM Lead. For more info about what this course [click here](#).

Introductions to the New Standards and Pedagogy:

This is a one-day training to introduce you to the pedagogy needed to teach the performance expectations in the new science standards. This course can be counted towards a face-to-face portion of the introduction to 3-Dimensional Learning Blended Canvas Course or it can be taken as a one-day training.

Intro to K-2 New Science Standards Pedagogy - Midas # 52843

Select one of the following dates:

October 1st

January 22nd

Intro to 3-5 New Science Standards Pedagogy - Midas #52839

Select one of the following dates:

October 21st

December 11th
