

## MYP Visual Arts 6

**Teacher:** Cosmo Hill-Miers; Natasha Alvares  
**Email:** oliver.hillmiers@aism-moz.com

Should you wish to learn more about our course or to discuss your learner's progress, please reach out to the email above to schedule a time to meet.

### Course Description and Units of Learning:

MYP Visual Art provides learners with opportunities to function both as artists and apprentices. By developing curiosity through the creative process, learners become effective inquirers and problem-solvers. Learners will create, present and analyse art in ways that engage and convey feelings, experiences and ideas. Learners will acquire new skills whilst mastering skills developed previously. MYP arts values the process of creating artwork and the point of realization; these two elements combined tell us what learners have experienced, understood and attempted to convey. In MYP arts, the four objectives, Knowing and Understanding, Developing Skills, Thinking Creatively and Responding, have equal importance and value. Although the objectives can be addressed separately to scaffold learning, when used collectively they enrich teaching and learning of the arts. The Grade 7 MYP Visual Arts course is being designed to provide a balance across the year of focused skill building units in a range of media and techniques while providing the space to choose self-directed inquiries thus encouraging the learners to develop their own artistic identity. The first half of the academic year will feature structured skills/media focused units of inquiry covering drawing, painting, mixed media, printmaking and basic ceramics. These will prepare the learners for a more 'Open Studio' setting thereafter where learners will design their own inquiries, form their own Statement of Inquiry and guiding questions as well as identifying the Global Contexts for artworks. In addition to planning and executing studio work, learners will be engaging in contextual research, consolidating aspects of studio etiquette and organising portfolios. Throughout the creative processes, learners will reflect on their changing roles, that of Commentator, Creator, Critic and Curator. Creative thinking is both an objective in the arts and an ATL (Approaches to Learning) skill across the MYP programme and encourages learners to develop metacognitive skills and become self-regulated artists working towards the real-world context of exhibitions.

This year we have begun planning and implementing units of study based on our Critical Learning Outcomes within the IB MYP and DP frameworks. Please see ManageBac for unit overviews as they are taught throughout the year.

## **Assessment in the Middle Years Programme**

Assessment is a key component of the learning process as it allows teachers to respond with targeted feedback to learners for continued growth and to revise their instruction to better meet the needs of their learners. In order to provide learners with the opportunity to reach critical learning outcomes and develop a range of approaches to learning skills, our MYP teachers develop rigorous tasks that embrace a variety of assessment strategies.

MYP assessment requires teachers to assess the prescribed subject-group objectives, using the assessment criteria, at least twice for each subject group in each year of the programme. Within each culminating assessment task, teachers and learners are guided by criteria that are provided to learners at least one week in advance of a culminating task, ensuring that assessment is transparent. Teachers then collaborate to standardize their expectations for learners' performance in order to ensure consistency prior to making a final judgement regarding achievement.

Families and learners at AISM can expect to receive regular reporting of their performance as they work towards mastery of critical learning outcomes.

## **Learning Management Systems**

Across the Secondary School, we utilize ManageBac for sharing key activities and assessments, as a digital workspace, for communication with learners, and for reporting on learner performance to families. Some teachers may supplement the digital learning environment with Google Classroom, and you can expect an emailed invitation to sign up for regular updates from Google Classroom if so.

## **Homework**

Any learning activity which is expected to take place outside of the classroom will appear as assignments and tasks on ManageBac. Homework is most often an extension of activities or projects either begun or included in the classroom, but may include common activities like reading, reinforcement of content or skills within a unit of study, or distributed practice activities, such as flashcards for example, to support learner recall of low-level content.

## **Reporting**

As a rough guide, learners and families can expect an update on performance every few weeks. These updates, available in ManageBac, represent a check-in on learner performance toward mastering critical course objectives and learning outcomes, prior to each unit's culminating assessment.
