How to Dispose of Prescription Medicines & Over-The-Counter (OTC) Products

Are you throwing away unused medications and over-the-counter products down the toilet or the sink? **STOP!**

Flushing medications down the toilet or sink causes water pollution, impacts drinking water and has adverse effects on septic systems, fish and other aquatic wildlife.

**The safe way to dispose of medications and OTC products is to put them in the trash.**

Here’s how to do it:

1. **Keep the medication in its original container.**
   - To protect privacy and discourage misuse of the prescription, cross out the patient’s name with a permanent maker or duct tape or remove the label. *(Chemotherapy drugs may require special handling. Work with your healthcare provider on proper disposal options for this type of medication.)*

2. **Modify the medications to discourage consumption.**
   - For **solid medications** such as pills or capsules: add a small amount of water to at least partially dissolve them.
   - For **liquid medications**: add enough table salt, flour, charcoal, or nontoxic powdered spice, such as turmeric or mustard to make a pungent, unsightly mixture that discourages anyone from eating it.
   - For **blister packs**: wrap the blister packages containing pills in multiple layers of duct or other opaque tape.

3. **Seal and conceal.**
   - Tape the medication container lid shut with packing or duct tape.
   - Place it inside a non-transparent bag or container such as an empty yogurt or margarine tub to ensure that the contents cannot be seen.
   - **Do not** conceal medicines in food products because animals could inadvertently consume them.

4. **Discard the container in your trash can.** **Do not put the container in your recycling bin!**

For more information, please contact:
Connecticut Department of Environmental Protection, Office of Pollution Prevention
79 Elm Street, Hartford, CT 06106 (860) 424-3297 [www.ct.gov/dep/p2](http://www.ct.gov/dep/p2)

For information on disposal of medical supplies such as thermometers and syringes, go to [http://www.ct.gov/dep/cwp/view.asp?a=2708&q=335480&depNav_GID=1763](http://www.ct.gov/dep/cwp/view.asp?a=2708&q=335480&depNav_GID=1763)

The CT DEP thanks the Minnesota Office of Environmental Assistance for permission to use parts of their brochure and the CT Department of Consumer Protection for their assistance.
