The objective of homework for students at Sacred Heart School is to practice the skills and concepts they have learned in class independently. We want our students to be able to confidently complete their homework with less guidance and help from parents the older they become. If an assignment poses an extreme challenge or causes significant frustration for your child, we would like to know. Also, if your child is spending twice the amount of time on homework for their grade level, they should be told to stop and their **parent should send in this completed form to their child's teacher** (in middle school, please direct the form to the teacher whose homework your child struggled with).
