WHY?

Apprenticeships are a win-win for workers and employers alike. Individuals get access to training in critical and relevant skills without the challenges of time and money that often accompany the pursuit of a degree – and employers benefit from higher productivity, increased retention rates, and a substantial return on investment. It's a “grow-your-own” strategy that better aligns the needs of employers with the interests of the workforce. Apprenticeships may have been around for centuries, but employers, training providers, and policymakers alike are rediscovering their value in advancing the future of work.

EXPECTED OUTCOMES

- Earn your high school diploma
- Earn professional certifications
- Earn nationally recognized credentials
- Earn up to two years paid employment

HOW?

- Partnership
 - TVYA connects qualified students with participating employers
 - Employers interview and hire students
 - Students begin employment (with pay) while taking high school and college courses
- Application
 - See your guidance department
 - You must be a rising junior or senior
 - You must be at least 16 years old

IBM executive Ned McCulloch is quoted on apprenticeship.gov saying, “Apprenticeship programs align academic classes, with teamwork, problem solving, and adaptability of on-the-job training. Apprentices develop a thorough understanding of workplace dynamics in addition to training in current technology.”
